GB2 panels switcher unit

Description

DP-GB2 is a door panel switching unit to link panels in GB2 systems. It allows to connect up to 4 panels in home-run connection. It can also be used as a floor distributor for up to 4 monitors. DP-GB2 is suitable only for GB2 system from Golmar.

GB2 is a pure 2 wires solution, the perfect system for villas and medium size buildings up to 22 apartments*. The system is very convenient for retrofit, thanks to its full digital transmission of audio, video and data, what makes it suitable for any type of wires. The system's wiring is not polarized, becoming GB2 an easy-to-install intercom solution. Reach its maximum performance using RAP-2150 cable and reach up to 160 meters from the entrance panel to the last monitor.

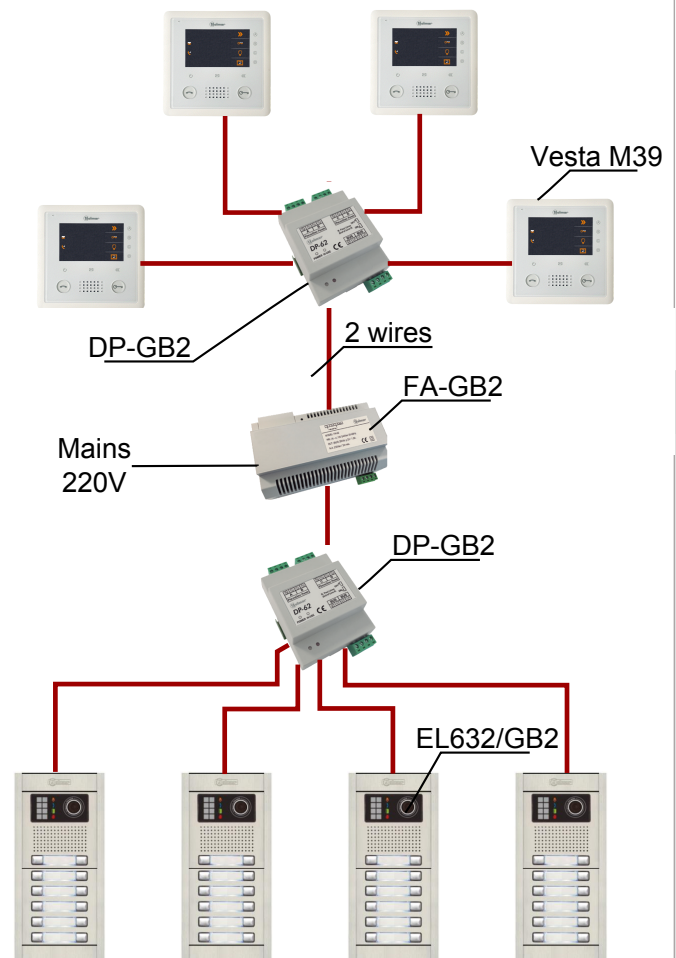

Dimensions: 90 (W) 110 (H) 45 (D) mm

Features

- BUS-in and BUS-out connection.
- 4 distributed inputs/outputs for door panels or monitors.
- 4 modules DIN rail mounting.
