

Description

T-5822VD is a V2Plus technology audio handset. It is used in 2 wires audio/video BUS technology (2Plus and V2Plus). T-5822VD handset is compatible with Nexa entry panels using EL620 module or with any other Golmar panel from Plus technology, using the CD-2Plus or CD-V2plus/TP converters.

T-5822VD allows 2 extra handsets or video monitors from V2Plus technology in parallel connected in the same apartment.

V2Plus is a 2 wires audio and video BUS. The BUS is not polarized what makes V2Plus an easy-to-install system.

Dimensions: 88 (W) 235 (H) 56 (D) mm
