IMPORTANT SAFEGUARD

CAUTION

RISK OF ELECTRIC SHOCK

CAUTION:

To reduce the risk of electric shock, do not expose this apparatus to rain or moisture. Only operate this apparatus from the type of power source indicated on the label. The company shall not be liable for any damages arising out of any improper use, even if we have been advised of the possibility of such damages.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

All lead-free products offered by the company comply with the requirements of the European law on the Restriction of Hazardous Substances (RoHS) directive, which means our manufacture processes and products are strictly "lead-free" and without the hazardous substances cited in the directive.

The crossed-out wheeled bin mark symbolizes that within the European Union the product must be collected separately at the product end-of-life. This applies to your product and any peripherals marked with this symbol. Do not dispose of these products as unsorted municipal waste. Contact your local dealer for procedures for recycling this equipment.

This apparatus is manufactured to comply with the radio interference requirements.

Federal Communications Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Trademark Acknowledgements

(EagleEyes) - The trademark application is filed and under process in the U.S. and other countries.

iPhone®, iPad® and iOS® are the registered trademark of Apple Inc., and Apple holds the intellectual property rights to the iPhone, iPad and iOS content.

Disclaimer

The information in this manual was current when released. We reserve the right to revise or remove any content in this manual at any time. We do not warrant or assume any legal liability or responsibility for the accuracy, completeness, or usefulness of this manual. For the actual display & operation, please refer to your DVR in hand. The content of this manual is subject to change without notice.

Grounding

This is a Safety Class 1 Product (provided with a protective earthing ground incorporated in the power cord). The mains plug shall only be inserted in a socket outlet provided with a protective earth contact. Any interruption of the protective conductor inside or outside of the instrument is likely to make the instrument dangerous. Intentional interruption is prohibited.

Water & Moisture

Do not expose this product to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the product.

MPEG4 Licensing

THIS PRODUCT IS LICENSED UNDER THE MPEG-4 VISUAL PATENT PORTFOLIO LICENSE FOR THE PERSONAL AND NON-COMMERCIAL USE OF A CONSUMER FOR (i) ENCODING VIDEO IN COMPLIANCE WITH THE MPEG-4 VISUAL STANDARD ("MPEG-4 VIDEO") AND/OR (ii) DECODING MPEG-4 VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL AND NON-COMMERCIAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED BY MPEG LA TO PROVIDE MPEG-4 VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION INCLUDING THAT RELATING TO PROMOTIONAL INTERNAL AND COMMERCIAL USES AND LICENSING MAY BE OBTAINED FROM MPEG LA, LLC. SEE [HTTP://WWW.MPEGLA.COM](http://www.mpegla.com).

GPL Licensing

This product contains codes which are developed by Third-Party-Companies and which are subject to the GNU General Public License ("GPL") or the GNU Lesser Public License ("LGPL").

The GPL Code used in this product is released without warranty and is subject to the copyright of the corresponding author.

Further source codes which are subject to the GPL-licenses are available upon request.

We are pleased to provide our modifications to the Linux Kernel, as well as a few new commands, and some tools to get you into the code. The codes are provided on the FTP site, and please download them from the following site or you can check with your distributor:

1. HARDWARE OVERVIEW

Note: The functions on the front panel and rear panel may vary, depending on the model you have.

1.1 Package Content

> Standard Package

- | | |
|---|--------------------------------------|
| <input type="checkbox"/> DVR | <input type="checkbox"/> HDD screws |
| <input type="checkbox"/> Adapter & power cord | <input type="checkbox"/> Quick Start |

> Optional Accessories

- | | |
|------------------------------------|---|
| <input type="checkbox"/> USB Mouse | <input type="checkbox"/> IR Remote Controller |
|------------------------------------|---|

1.2 Front Panel

1) LED Indicators

-  DVR is powered on.
-  The hard disk is reading or recording.
-  An alarm is triggered.

2) CH1 ~ 16 / 1 ~ 8 / 1 ~ 4

Press the channel number buttons to select the channel to display.

3)

Press to show the 4 channel display mode.

4) SEQ

Press to display each channel in full screen one by one starting from CH1. When the last channel is displayed, it will repeat from CH1 again. To exit this mode, press **SEQ** again.

5) SLOW

In the playback mode, press to show slow playback.

6) ZOOM

Press to enlarge the picture of selected channel in the FRAME or FIELD recording mode.

7) PLAY

Press to playback the latest recorded data.

8) LIST (Event List Search)

Press to quickly search the recorded files by event types, or select **FULL** to show all the event logs.

To quickly search the time you want, select **QUICK SEARCH**. For details, please refer to "5.4.2 Event Search" at page 20.

9) ENTER

Press **ENTER** to confirm the setting.

10) MENU

Press **MENU** to enter the main menu.

11) **▲ (+ / PAUSE) / ▼ (- / STOP) / ◀ (REW) / ▶ (FF)**

Press ▲ / ▼ / ◀ / ▶ to move up / down / left / right.

In the playback mode:

Press ▲ to pause playback.

Press ▼ to stop playback.

Press ▶ to fast forward.

Press ◀ to fast rewind.

12) **AUDIO (SLOW + ZOOM)**

Press **SLOW + ZOOM** to select live or playback audio from audio channel 1~4.

 Live audio from audio channel 1~4
(indicated in white).

 Playback audio from audio channel 1~4
(indicated in yellow).

 Audio channel unselected

13) **P.T.Z. ( + SEQ)**

Press  + **SEQ** at the same time to enter / exit the PTZ control mode.

14) **USB port**

There are two USB ports on the front panel, one for connecting your USB mouse for mouse control, and the other one for connecting your USB flash drive for video backup.

Note: It's not allowed to have two USB mice or two USB flash drives connected on the front panel.

Note: For the compatible USB flash drive list, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST" at page 69.

1.3 Rear Panel

1) **VIDEO IN**

Connect to the video connector of a camera.

Note: The DVR will automatically detect the video system of the camera, please make sure that the cameras are properly connected to the DVR and power-supplied before the DVR is turned on.

2) **VIDEO OUT**

Connect to a CRT monitor for main or spot monitor output.

3) **AUDIO IN**

Connect to the audio connector of a camera if the camera supports audio recording.

Note: To make a video backup with audio, make sure the camera which supports the audio function is connected to the video-in channel and audio-in channel. For example, the audio data from audio CH1 will be recorded with the video data from video CH1.

For 16CH models, the audio CH1 ~ CH4 are corresponding to video CH1 ~ CH4 respectively.

4) **AUDIO OUT**

Connect to a speaker with 1 mono audio output.

5) **HDMI**

Connect to the HDMI port of the monitor which supports HDMI video output for main or spot monitor output.

6) **VGA**

Connect to the VGA port of the monitor which supports VGA video output for main or spot monitor output.

- 7) USB port (USB 3.0 / For selected models only)
Used for connecting your USB flash drive for video backup.
-

Note: For the compatible USB flash drive list, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST" at page 69.

- 8) External I/O (Alarm IN / Alarm Out / RS485)
These ports are used to connect external devices (such as speed dome cameras or external alarm, etc).
- 9) LAN
Connect to Internet by LAN cable.
- 10) DC IN
Connect to the supplied adapter.
- 11)  Power Switch (For selected models only)
Switch to "—" to turn on the power, and "O" to turn off the power.

2. CONNECTION AND SETUP

Before the DVR is powered on, make sure you have installed a hard disk, connected at least one camera and a HDMI monitor. For details, please refer to the following sections.

Note: The DVR is designed to automatically detect the video system of the connected cameras (NTSC or PAL). To make sure the system detection is correct, please check if the cameras are connected to the DVR and power-supplied before the DVR is powered on.

2.1 SATA Hard Disk Installation

At least a hard disk is necessary for the recorder to save video footage, and firmware upgrade might be failed if there's no hard disk installed in this recorder.

Either of the following two types of hard disk installation is applicable for your DVR model. Please check the instructions below to see which installation method is the right one for your DVR to install a hard disk.

Note: Here takes an 8CH model as an example of how to connect a hard disk to your device. To know how many hard disks could be installed, please refer to the specifications of your device.

Step1: Remove the top cover, and find where to install a hard disk.

Step2: Get a compatible hard disk. With the PCB side facing down, find the screw holes on the DVR base, and place the hard disk in the DVR.

Note: To use a green hard disk, use **ONLY** the hard disk designed especially for surveillance to ensure the device works properly.

Step3: Align the screw holes on the DVR base and the hard disk. Then, fasten the hard disk to the DVR base with the supplied screws from the bottom side of the DVR.

Step4: Connect the data bus and power cable for the hard disk.

Step5: Replace the top cover and fasten the screws you loosened in Step1.

Step6: Remove the protective film on the bottom of the DVR if any to ensure the heat dissipation can work normally.

2.2 Camera Connection

Install the camera on the wall or ceiling based on your installation environment and camera type. For installation details, please refer to the user manual of your camera.

2.2.1 HD CCTV camera & our brand's speed dome camera

STEP 1: Connect the coaxial cable to the recorder.

STEP 2: Get a regulated adapter to connect the camera and power it on.

EZUM Camera Series

If the cameras you connected are our EZUM camera series, we have also designed a series of icons for quick camera setup. Based on the EZUM camera type connected, you may find some of the icons as listed below for quick camera configurations, and the sub-functions of each icon may also vary based on the camera connected.

Path: Bottom left on each camera channel view →

| | | | |
|--|--|--|---|
| | Day & Night Configure the day and night modes of the camera | | IR Management Manually adjust the brightness of IR LEDs. |
| | Noise Reduction Reduce image noise if needed. | | Optics Manually change the shutter speed if needed. |
| | Color Manually adjust the color-related parameters if needed. | | Image Enhancement Enhance the image performance for better sharpness and overall identification even in overexposure areas. |
| | Zoom Used with the motorized lens cameras for optical zoom. | | Hot Point Click on the screen to move the surveillance area to the point just clicked. |
| | PTZ Control Open the PTZ control panel to pan, tilt, zoom and cruise the camera. | | Advanced Set other camera parameters such as camera system, and mirroring or flipping camera images. |

2.2.2 Other brand's speed dome camera

Note: The recorder must support RS485 connection to connect a speed dome camera. Please check the specifications of your recorder for details.

STEP 1: Connect the coaxial cable to the recorder.

STEP 2: Find where the connectors of RS485-A and RS485-B are located on the recorder rear panel, and follow the instructions of your camera manual to connect to the recorder. Then, power on the camera.

STEP 3: On the recorder side, right click to show the main menu, and go to  (ADVANCED CONFIG) → **DCCS** → **OSD MENU** to set the camera:

- a) Select the device to **PTZ**.
- b) Set the ID to the value the same as the one set in the camera.
- c) Select the protocol to **P-P**, **P-D**, **S-T** or **S-E**.

Note: **P-P** and **P-D** are protocols used Pelco, and **S-T** and **S-E** are protocols used by Samsung.

- d) Set the baud rate to the value the same as the one set in the camera.
- e) Set the interface to **RS485**.

| ADVANCED CONFIG | |
|-----------------|--|
| CAMERA | CH1 CH2 CH3 CH4 |
| DETECTION | DEVICE PTZ <input type="checkbox"/> |
| ALERT | ID 000 |
| NETWORK | PROTOCOL P-P <input type="checkbox"/> |
| DISPLAY | RATE 2400 <input type="checkbox"/> |
| RECORD | INTERFACE RS485 <input type="checkbox"/> |
| DEVICES | |
| DCCS | |
| IVS | |
| NOTIFY | |
| JOYSTICK | |
| EXIT | |

2.2.3 IP Camera

Note: Check the specifications of your recorder and see if your recorder supports IP camera connection.

STEP 1: Prepare a switch / router, and connect the recorder and the IP camera to the router with RJ45 network cables.

STEP 2: Make sure your camera supports DHCP function to allow the connected router to assign an IP address to the camera.

If your camera doesn't support this function, please check its user manual to know how to manually change the IP address of your camera and make sure its IP address is in the same network segment as the one your router uses.

STEP 3: Power on the camera.

STEP 4: On the recorder side, move the cursor to the left to show the quick bar, and choose  (IP Search) to find your camera.

| IP SEARCH | | | | | |
|---|------|-------------------|-----------|----------|--------|
| IP | PORT | MAC | TYPE | PROTOCOL | STATUS |
| 192.168.1.12 | 88 | 00:0e:53:e5:9a:f1 | IP CAMERA | AVTECH | UNUSED |
| 192.168.1.12 | 88 | UNKNOWN | IP CAMERA | ONVIF | UNUSED |
|  | | | CONNECT | SETUP | EXIT |

STEP 5: Select the IP address which is not used and select **CONNECT** to assign which channel the live video should be displayed.

2.3 DVR Power On

This device should be operated only with the type of power source indicated on the manufacturer's label. Connect the indicated AC power cord to the power adapter, and plug into an electrical outlet.

If your device has a power switch on the rear panel, turn it to “—”. The power LED will be on. If your device doesn't have a power switch on its rear panel, the power is on once the power source is connected.

Note: Before the DVR is powered on, make sure (1) the cameras are connected and power-supplied for the detection of the camera video system to be correct, and (2) a monitor is connected to the DVR for correct video output detection.

Note: To ensure that your DVR works constantly and properly, it's recommended to use an UPS, Uninterruptible Power Supply (Optional), for continuously operation.

Note: When your DVR is powered on, please check the chapter of “3. FOR INITIAL USE” in the user manual to know how to configure this device and change the default user name and password. To download the user manual, please scan the QR code on the first page, or go to www.surveillance-download.com/user/z2116.swf.

3. FOR INITIAL USE

For the first time to power on this device, you might be prompted to:

- Go through the setup wizard
- Clear hard disk
- Change default user name and password

3.1 Setup Wizard

The setup wizard is prompted to guide you finishing the most common settings you might need to do.

Note: It's okay to skip the wizard. You can configure the following settings later in their respective menus.

| SETUP WIZARD | |
|---|--|
| | ENGLISH <input type="button" value="v"/> |
| <p>WELCOME TO THE SETUP WIZARD.</p> <p>PLEASE FOLLOW THE WIZARD TO FINISH BASIC CONFIGURATIONS.</p> | |
| <input type="button" value="SKIP"/> | EaZy <input type="button" value="NEXT"/> |

Choose **EaZy** (EaZy Networking) to directly go to the EaZy Networking setting page, and refer to "APPENDIX 7 EAZY NETWORKING" at page 74 for details.

Note: To configure network setup by using EaZy Networking later, please go to **QUICK START → EaZy**.

Or select "NEXT" to go to the next step.

| SETUP WIZARD | |
|--|---|
| PLEASE INPUT THIS MACHINE NAME | |
| <input style="width: 100px;" type="text"/> | |
| <input type="button" value="SKIP"/> | <input type="button" value="PREV"/> <input type="button" value="NEXT"/> |

Name the device. If you don't want to name the device, just skip to the next step.

Note: To name the device later, please go to **SYSTEM → SYSTEM INFO**.

| SETUP WIZARD | |
|--|---|
| USER NAME | office_hd |
| PASSWORD | office145 |
| CONFIRM PASSWORD | office145 |
| PLEASE INPUT THE ADMINISTRATOR'S USER NAME AND PASSWORD. | |
| <input type="button" value="SKIP"/> | <input type="button" value="PREV"/> <input type="button" value="NEXT"/> |

Change the default user name and password. If you don't change the user name and password here, you're not able to go to the next step. This step is compulsory.

Note: To change or edit user name and passwords, please go to **SYSTEM → ACCOUNT**.

| SETUP WIZARD | | |
|---|-------------|---|
| DATE | 2015/MAR/05 | |
| TIME | 14:33:46 | |
| FORMAT | Y/M/D | ▼ |
| GMT | GMT+08:00 | ▼ |
| <input type="button" value="SKIP"/> <input type="button" value="PREV"/> <input type="button" value="NEXT"/> | | |

Set the date and time.

If you don't want to set the date and time now, just skip to the next step. However, it's necessary to keep the date and time right to ensure the accuracy of the recorded data.

Note: To set the date and time later, please go to **QUICK START** → **TIME SETUP** ("6.1.2 TIME SETUP" at page 25). When the date and time are changed, you'll be prompted to clear the hard disk(s). Select **YES** to erase the previous recorded data, or there might be data disorder and you wouldn't find the footage you need.

| SETUP WIZARD | | |
|---|--------------|---|
| NTP SERVER | Pool.ntp.org | |
| SYNC PERIOD | OFF | ▼ |
| <input type="button" value="SKIP"/> <input type="button" value="PREV"/> <input type="button" value="NEXT"/> | | |

Configure if you want to connect this device to an NTP server to get the right time online.

Note: To set the date and time later, please go to **QUICK START** → **TIME SETUP** ("6.1.2 TIME SETUP" at page 25).

| SETUP WIZARD | | |
|---|---------------|---|
| NETWORK TYPE | STATIC | ▼ |
| IP | 192.168.1.10 | |
| GATEWAY | 192.168.1.1 | |
| NETMASK | 255.255.255.0 | |
| PRIMARY DNS | 8.8.8.8 | |
| SECONDARY DNS | 168.95.1.1 | |
| PORT | 80 | |
| <input type="button" value="SKIP"/> <input type="button" value="PREV"/> <input type="button" value="NEXT"/> | | |

Configure network setup by using the traditional method. For details, please download www.surveillance-download.com/user/network_setup/network_setup_recorder.pdf.

Note: To configure network setup by using the traditional method later, please go to **ADVANCED CONFIG** → **NETWORK** ("NETWORK" at page 39).

| SETUP WIZARD | | |
|---|-------------------|--|
| SMTP SERVER | Smtplib@gmail.com | |
| PORT | 465 | |
| MAIL FROM | manager@gmail.com | |
| SSL ENCRYPTION | ON | |
| VERIFY PASSWORD | ON | |
| USER NAME | manager@gmail.com | |
| PASSWORD | ●●●●●●●● | |
| <input type="button" value="SKIP"/> <input type="button" value="PREV"/> <input type="button" value="NEXT"/> | | |

Configure event notifications by email.

Note: To configure email notifications later, please go to **ADVANCED CONFIG** → **NETWORK** -> **EMAIL** ("E-MAIL" at page 39).

| SETUP WIZARD | |
|---|---------------|
| DDNS | ON |
| SYSTEM NAME | Eagleeyes |
| HOST NAME | MAC000E533A3D |
| E-MAIL | |
| CURRENT HOST ADDRESS MAC000E533A3D4A.ddns.eagleeyes.tw | |
| SKIP | PREV NEXT |

Enable DDNS if needed.

Note: To enable the DDNS later, please go to **ADVANCED CONFIG** → **NETWORK** → **DDNS** ("NETWORK" at page 39).

3.2 Clear Hard Disk

When this device is powered on, hard disk detection will be on, and you'll be prompted to clear the hard disk(s):

| CLEAR HDD | |
|----------------|----|
| CLEAR HDD HDD0 | |
| YES | NO |

Please choose "YES" to clear the connected hard disk(s), or this device will not detect hard disks properly for video recording.

It might take some time to clear the connected hard disk(s). When it's done, you'll see the remaining hard disk capacity on the top right corner of the screen.

Note: It's necessary to clear hard disks in order to format the connected disks to the right format to save video data. The format used for this device can **NOT** be read directly on a PC. Please do not install the hard disk directly to a PC and try to copy the video data saved in the hard disk. The video data might be impaired.

To change later, right click to show the main menu, and select  (SYSTEM) → **SYSTEM INFO** → **CLEAR HDD**. The DVR will reboot when hard disk data are cleared.

| SYSTEM | |
|--------------------|-----------------------------|
| ACCOUNT | BAUD RATE 2400 |
| TOOLS | HOST ID 000 |
| SYSTEM INFO | R.E.T.R 5 |
| ONLINE | AUTO KEY LOCK(S) NEVER |
| BACKUP DATA | CLEAR HDD HDD-0 |

| | REMOTE CONTROL ID 000 |
| | DEVICE TITLE OFFICE |
| | SERIAL TYPE RS485 |
| | VIDEO FORMAT NTSC |
| | VERSION 1019-1008-1010-1010 |
| EXIT | |

3.3 Change User Name and Password

It's highly recommended to change the user name and password of this device to keep your account safe. Otherwise, any person could access this device if he knows the default user name and password.

If you didn't go through the setting wizard at the first place, you'll be prompted to change the user name and password:

| WARNING | |
|---|--|
| PLEASE BE ADVISED TO MODIFY THE DEFAULT ACCOUNT TO ENSURE YOUR INFORMATION SECURITY. | |
| <input checked="" type="radio"/> MODIFY <input type="radio"/> REMIND ME LATER <input type="radio"/> DON'T REMIND ME ANYMORE | |
| <input type="button" value="CONFIRM"/> | |

Choose **MODIFY** to start the change immediately.

To change later, right click to show the main menu, and select  (SYSTEM) → **ACCOUNT** to change the default user name and password of **SUPERVISOR**.

| SYSTEM | | | |
|----------------|-----------|------------|-----|
| ACCOUNT | USER LIST | GROUP | |
| TOOLS | USER NAME | GROUP | |
| SYSTEM INFO | admin | SUPERVISOR | |
| ONLINE | | | |
| BACKUP DATA | | | |
| BACKUP LOG | | | |
| EXIT | ADD | EDIT | DEL |

4. USER INTERFACE

4.1 DVR Access

Connect your USB mouse to one of the USB ports on the DVR front panel, and check if there's a mouse icon (🖱️) on the screen, indicating the USB mouse is detected properly.

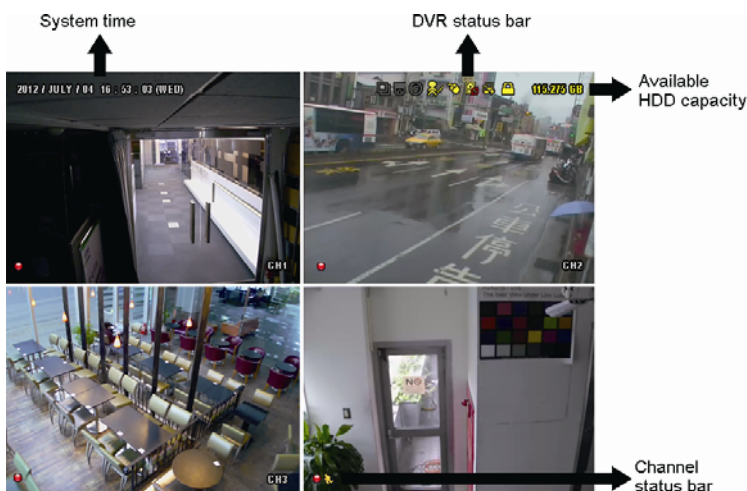

Move your mouse to enter the DVR password with the password keypad. The default user name and password are both "admin". The status will be changed from 🔒 (key lock) to 🗝️ (unlock).

Note: You may configure four different user levels to have different access privileges in **SYSTEM** → **ACCOUNT**. For details, please refer to "5.2 User Level Creation" at page 15.

Password Input

4.2 Live Page

4.2.1 DVR Status

Note: Certain icons are for selected models only.

4.2.2 Channel Status

Note: The functions shown may vary based on the model or the access user level you use.

For Analog Camera

| | | | | | | | |
|---|--------------------|---|---------------------|---|--------------------|---|--------------------|
|  | Live audio on |  | Audio off |  | Audio playback on |  | Audio playback off |
|  | Recording |  | PTZ control |  | Motion event |  | Alarm event |
|  | PIR event |  | Virtual fence event |  | One way pass event |  | Scene Change event |
|  | Camera quick setup | | | | | | |

For IP Camera

| | | | | | | | |
|---|------------------|---|----------------------|---|----------------------|---|--------------------|
|  | Auto search on |  | Auto search off |  | Original size |  | Fit to screen |
|  | Live audio on |  | Audio off |  | Audio playback on |  | Audio playback off |
|  | Recording |  | PTZ control |  | Alarm event |  | Motion event |
|  | Live information |  | Playback information |  | Quick camera control | | |

4.2.3 Record-related Icons

1) Manual Recording

By defaults, manual recording is on (●) when the DVR is powered on and a hard disk is installed.

2) Event Recording

The event icons,  /  /  /  /  /  , show on the channel status bar when their respective events occur and the related record function is on.

3) Timer Recording

When timer recording is on, you will see  on the screen.

4) HDD Overwritten

By defaults, the HDD overwritten function is set to ON, and  will be shown on the screen.

Note: To disable this function, right click to display the main menu in the live view, and go to  (ADVANCED CONFIG.) → **RECORD** → **OVERWRITE**.

4.3 Quick Menu Bar

Move to the arrow mark to extend the quick menu bar and show the five functions as follows:

Quick Menu: Open

Click to show the channel switch panel and select the channel you want.

Click to display the playback control panel, and click  to play the latest recorded video clip, or click  to enter the search list.

Available only for models which support IP camera connection.

Search for any IP camera(s) connected and assign the camera to a specific channel. For details, please check "For IP Camera" at page 13.

Switch to the channel you want first, and click  to enter the zoom-in mode. In this mode, click and drag the red frame on the bottom left of the screen to move to the place you want to see. To exit this mode, click .

Click to show the power off panel to either halt or reboot the system.

4.4 Main Menu

Right-click anywhere on the screen to show the main menu as follows, and right-click again to exit.

Main Menu

QUICK START

Click to set the status display, image settings, and date & time.

SYSTEM

Click to set the system configurations.

EVENT INFORMATION

Click to enter the event search menu.

ADVANCED CONFIG

Click to set CAMERA, DETECTION, ALERT, NETWORK, DISPLAY, RECORD, DEVICES*, DCCS, IVS*, NOTIFY* and JOYSTICK.

SCHEDULE SETTING

Click to set timer for record, motion detection, alarm (in and out)*, Push Video*, buzzer, regular report*, auto backup*, and regular reboot*.

** For selected models only*

5. FREQUENTLY-USED FUNCTIONS

5.1 Key Lock / Unlock

To lock or unlock local operation, click  (unlock) or  (lock) on the DVR status bar to change the status to  (lock) or  (unlock).

To unlock local operation, you'll be prompted to enter the user name and password to access.

Note: The default user name and password are both **admin**, which is the highest user level.

Note: Different user level has different access privilege for certain DVR functions. Please refer to "5.2 User Level Creation" at page 15.

5.2 User Level Creation

Note: This function is available only for **SUPERVISOR**.

To create different user account for different access privilege, click  (SYSTEM), and select **ACCOUNT** to enter **USER LIST**.

| SYSTEM | | | |
|----------------|-----------|------------|-----|
| ACCOUNT | USER LIST | GROUP | |
| TOOLS | USER NAME | GROUP | |
| SYSTEM INFO | admin | SUPERVISOR | |
| ONLINE | power | POWER USER | |
| BACKUP DATA | normal | NORMAL | |
| BACKUP LOG | guest | GUEST | |
| EXIT | ADD | EDIT | DEL |

Different user group has different access privilege for certain functions as described below:

Note: It's also available to create a new user group and customizing its access rights. For details, please refer to "GROUP" at page 27.

| | Function | User Group | | | |
|---|-------------------------------------|------------|------------|------|-------|

5.3 PTZ Control

Note: This function is available only for **SUPERVISOR** and **POWER USER**. To know more details, please refer to “5.2 User Level Creation” at page 15.

Note: For our brand’s HD CCTV motorized camera series, click  might only show specific icons for focal length and focus adjustment. For details, please refer to its own user manual.

In the full view

In the split view, click the channel you want to switch to the full screen mode, and click  to show the PTZ control panel.

| | | |
|---|--------------------------|---|
|  | Enter | Click to confirm your selection / enter the menu. |
|  | Up / Down / Left / Right | Click the arrow keys (▲ / ▼ / ◀ / ▶) to move the camera lens up / down / left / right. |
|  | Iris + / Iris - | This two buttons are designed for the PTZ camera which uses Pelco-D to control. To know the actions after clicking Iris + and Iris -, please refer to the camera’s user manual. |
|  | Zoom in / out max | Click to zoom in on the image to the largest / zoom out on the image to its original size. |
|  | Zoom in / out | Click to zoom in / out on the image. Users could also zoom in / out on the image by simply drawing a square on the screen, and the zoom ratio depends on how large the square is. <ul style="list-style-type: none"> ■ Zoom in: Draw the square from top left to bottom right. ■ Zoom out: Draw the square from bottom right to left top. |
|  | Focus near / far | Click to adjust the focus of the image. |
|  | Auto mode | Click to activate the auto function. Before using it, you need to assign a specific function that will be enabled when  is clicked. For details, please refer to the user manual of the camera. |
|  | Auto tracking | Click to start auto tracking when your speed dome camera supports this function. |
|  | Preset point | Click to enter the PTZ preset point you want to see. |
|  | Camera Menu | Click to enter the camera main menu. For details about each camera menu, please refer to its own user manual. |
|  | Manual Focus | This function is used to memorize the focus parameters you’ve made after you use  /   /  to manually adjust the focal length and focus. The next time when you move to the same focal length, the camera will use the parameters as the ones for Auto Focus. |
|  | Auto Focus | Click to automatically adjust the focus of the camera. |
|  | Joystick | Click to control the movement of a speed dome camera or a motorized-pan camera. Drag and hold the mouse on the screen to move the camera. You’ll see ● and ●➤ on the screen. The farther these two icons, the faster the movement. |
|  | Config. | Click to configure the speed to pan / tilt the speed dome camera. |

In the split view

Click  on the channel status bar to display the panel as follows:

| | | | |
|---|---|--------------------------|--|
|  |  | Up / Down / Left / Right | Click to move your selection up / down / left / right, or change settings. |
| |  | Digital zoom in / out | Click to zoom in / out the camera image digitally. |
| |  | Focus near / far | Click to adjust the focus of the image. |
| |  | Preset point | Click to display the preset point panel for preset point viewing or setting. For details, please refer to the section below. |

How to set a preset point:

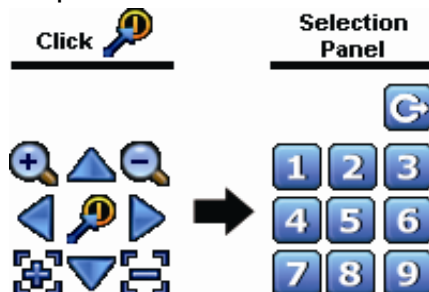

Step1:

- Step2: Click  to the proper ratio you need, and click  to move to the point you want to configure as a preset point.
- Step3: Click the numbering you want to configure for this point, and wait till you see  (command sending) appearing and disappearing on the DVR status bar.
- Step4: Repeat from Step1 again to set other points if needed, or click  to return to the preset point selection panel.

How to go to a preset point:

Step1:

Step2: Select the numbering within which saves the camera view you want to see, and wait till you see  (command sending) appearing and disappearing on the DVR status bar.

5.4 Playback

Note: This function is *NOT* available for **GUEST**. Please refer to “5.2 User Level Creation” at page 15.

Click “” on the quick menu bar to display the playback control panel, and click  to play the latest recorded video clip, or click  to enter the search list.

Note: There must be at least 8192 images of recorded data for playback to work properly. If not, the device will stop playback. For example, if the IPS is set to 30, the recording time should be at least 273 seconds (8192 images / 30 IPS) for the playback to work properly.

Step1: In **CHANNEL**, choose the channel(s) you want to search.

Step2: In **DATE**, the date(s) which includes video footage of the selected channel(s) will be marked in blue. Choose the date you want.

Step3: (Optional) In **EVENT**, choose the event type(s) to narrow down the search if needed.

Step4: Slide the timeline to search the time segment within which includes video footage. The time segment within which includes video footage is marked in yellow-green.

Step5: Move to the time segment you want and video playback starts automatically.

5.4.1 Playback Control

| | | |
|---|----------------------|--|
|  | Fast Forward | Increase the speed for fast forward. Click once to get 4X speed forward and click twice to get 8X speed, etc., and the maximum speed is 32X. |
|  | Fast Rewind | Increase the speed for fast rewind. Click once to get 4X speed rewind and click twice to get 8X speed, etc., and the maximum speed is 32X. |
|  | Play / Pause | Click to play the latest recorded video clip immediately, and click again to pause. In the pause mode, click  once to get one frame forward, and click  to get one frame rewind. |
|  | Stop | Click to stop the video playback. |
|  | Slow Playback | Click once to get 1/4X speed playback, and click twice to get 1/8X speed playback. |
|  | Previous / Next Hour | Click to jump to the next / previous time interval in an hour, for example, 11:00 ~ 12:00 or 14:00 ~ 15:00, and start playing the earliest event video clip recorded during this whole hour. |
|  | Repeat | Click to set point A and point B in a video clip, and the system will play only the specified range in that clip. |
|  | Backup | Click to open the backup menu for video backup. |

5.4.2 Event Search

Click  to quickly search the recorded files by event types, or select **FULL** to show all the event logs.

To quickly search the time you want, select **QUICK SEARCH**.

5.4.3 Audio Playback

In the playback mode, click  or  on the channel status bar to play or mute audio recording.

Note: To make a video backup with audio, or play a recording with audio, make sure the camera which supports the audio function is connected to the video-in channel and audio-in channel. For example, the audio data from audio CH1 will be recorded with the video data from video CH1. For 16CH models, the audio CH1 ~ CH4 are corresponding to video CH1 ~ CH4 respectively.

5.5 Video Backup

Note: This function is available for **SUPERVISOR**. For details, please refer to "5.2 User Level Creation" at page 15.

Note: Before using your USB flash drive for video backup, please format it to "FAT32" first with your PC or laptop. For the list of compatible USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST" at page 69.

Note: Video backup could be made via a USB flash drive or the Internet. It's **NOT** allowed to connect the hard disk to your PC / laptop directly for it may impair the recorded data saved in the hard disk.

To copy video data for video backup, click  (SYSTEM), and select **BACKUP DATA**.

Note: Or you can click  when you're in the playback page.

| SYSTEM | | |
|--------------------|--------------------------|---|
| ACCOUNT | START DATE | 2009/NOV/19 |
| TOOLS | START TIME | 08:30:21 |
| SYSTEM INFO | END DATE | 2009/NOV/19 |
| ONLINE | END TIME | 17:59:29 |
| BACKUP DATA | CHANNEL | 3 SELECTED  |
| BACKUP LOG | | <input type="checkbox"/> ALL |
| | | <input checked="" type="checkbox"/> CH1  |
| | | <input checked="" type="checkbox"/> CH2 |
| | | <input checked="" type="checkbox"/> CH3 |
| | | <input type="checkbox"/> CH4 |
| | | <input type="checkbox"/> CH5  |
| | HARD DISK | ALL HDD  |
| | OUTPUT FILE FORMAT | AVI |
| | TARGET DEVICE | USB DEVICE |
| | BACKUP | SUBMIT |
| | REQUIRE SIZE: 554MB | SUBMIT |
| EXIT | AVAILABLE SIZE: 3788.0MB | |

Step1: Select the time within which includes the video data you want to backup.

Step2: Select the channel(s) within which includes the video data you want to backup.

Step3: In **OUTPUT FILE FORMAT**, select the output video format: **DEFAULT / AVI**.

- When **DEFAULT** is selected, the footage is saved to ".dv5", and you can only open it with our own video player on PC. For details, please check the section, "5.6 Video Playback on PC (.dv5)".

Note: It's recommended to save the file to the default format for security reasons. Only specific video player supports the default format and not everyone can see the video footage.

- When **AVI** is selected, the footage will be converted to ".avi", and you can open it with any media player which supports the "avi" format on PC.

Step4: In **TARGET DEVICE**, select **USB DEVICE** for video backup.

Step5: In **REQUIRE SIZE**, select **SUBMIT** to know the file size of the selected footage.

Step6: In **BACKUP**, select **SUBMIT** to start copying footage to your USB flash drive, and wait till the backup successful message appears.

5.6 Video Playback on PC (.dv5)

For video backup with the format ".dv5", you can only use our own player to play.

Note: It's **NOT** allowed to remove the hard disk installed in the DVR and connect it directly to your PC to check recorded video clips. It might impair the files saved in the hard disk, causing the loss of those files even when the disk is replaced back to the DVR.

To play ".dv5" video on your PC:

Step1: Insert the USB flash drive with recorded data into your PC.

Note: The supported PC operating systems are Windows 10, Windows 8, Windows 7 & Windows Vista.

Step2: Find the program "PLAYER.EXE" in the USB flash drive, and double-click it to install.

Note: "PLAYER.EXE" can also be downloaded from www.surveillance-download.com/user/z2116.swf.

Step3: Run the program, *VideoPlayer*, and browse to where you save the recorded data.

Step4: Select the file you want to start video playback.

5.6.1 Convert the file format to AVI

To convert the video file format to AVI, click **AVI** from the playback panel to start file conversion.

Note: The recorded audio (if any) will be removed when the file format is converted to AVI.

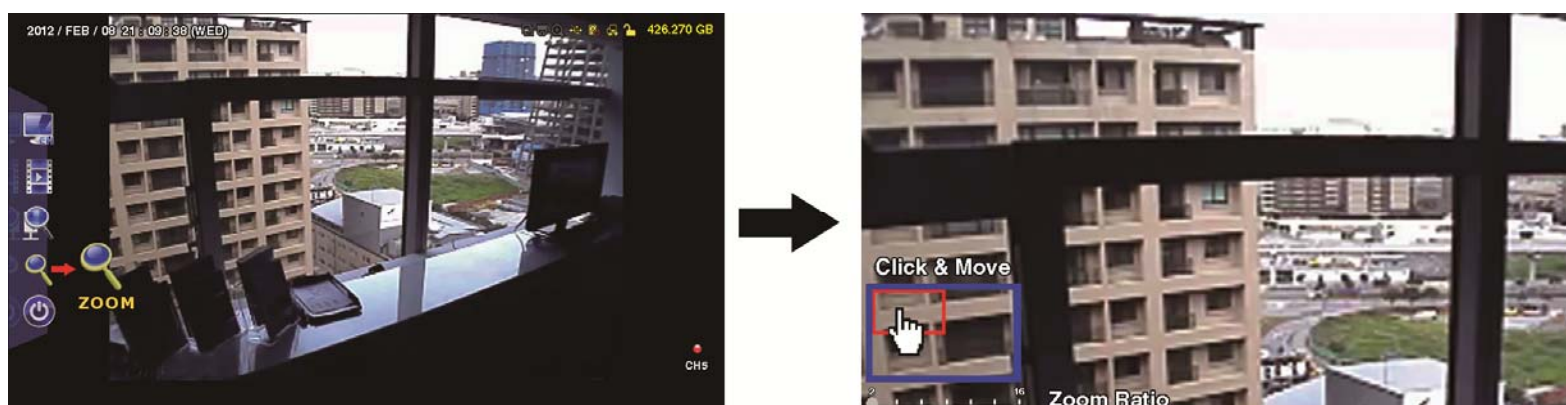

Note: If the footage includes data for multiple channels, click to a specific channel for this function to work properly.

5.7 Digital Zoom

Switch to the channel you want to zoom in, and move to the left side of the screen to show the quick start bar.

Click  to enter the zoom-in mode. In this mode, click and drag the red frame on the bottom left of the screen to move to the place you want to see.

To exit this mode, right-click anywhere on the screen.

Note: You need to exit the zoom mode first to use other DVR functions.

6. MAIN MENU

6.1 QUICK START

6.1.1 GENERAL

| QUICK START | |
|----------------|--------------------------|
| GENERAL | CHANNEL TITLE ON |
| TIME SETUP | EVENT STATUS ON |
| DAYLIGHT | DATE DISPLAY ON |
| EaZy | DCCS DISPLAY ON |
| | MOUSE SENSITIVITY 0 5 10 |
| | AUDIO GAIN 0 5 15 |
| | RECORD CONFIG SETUP |
| EXIT | |

- 1) CHANNEL TITLE
Select to display the channel title or not (**ON / OFF**).
- 2) EVENT STATUS
Select to display the event icons or not (**ON / OFF**).

Note: For details about each event icon, please refer to "4.2 Live Page" at page 12.

- 3) DATE DISPLAY
Select to display the date or not (**ON / OFF**).
- 4) DCCS DISPLAY
Select to display the OSD or not (**ON / OFF**) when users are using specific camera functions.

Note: This function is available only when the connected HD CCTV camera is the same brand as this recorder.

- 5) MOUSE SENSITIVITY
Select the mouse sensitivity. The higher the value, the more sensitive the mouse.
- 6) AUDIO GAIN
Select the level to enhance the audio signals. The higher the value, the stronger the signals.

7) RECORD CONFIG

Click **SETUP** to enter the setting page individually for manual record, event record and timer record.

a) Select the record type you want to set.

b) In **CHANNEL**, select **ALL** to apply the changes here to all channels.

Note: The I.P.S. section is based on NTSC system.

| QUICK START | | | | | |
|---------------|--------------|--------------|------------|----------------|--------|
| MANUAL RECORD | EVENT RECORD | TIMER RECORD | SUBSTREAM | | |
| CHANNEL | IMAGE SIZE | I.P.S. | QUALITY | BITRATE (kbps) | G.O.V. |
| ALL | FHD(1080P) | 240 | SUPER BEST | 2064 | 30 |
| | | | | | EXIT |

Or, select **BY CHANNEL** to set the image size, image per second & image quality individually for each channel.

Note: The available options for **IMAGE SIZE** depend on the recorder you have.

Note: The video recording is up to 1080P even when the camera you're connected is a camera with 3MP resolution or more.

| | |
|------------|---|
| IMAGE SIZE | The pixels of the image, for example, FHD(1080P) = 1920 x 1080. The more the pixels, the clearer the image but the more the file size. |
| I.P.S. | Image per second. The more the I.P.S., the more fluent the video but the more the file size. |
| QUALITY | Image quality. <ul style="list-style-type: none"> ■ For IP cameras, the quality is scaled from 0 to 10. The higher the value, the better the image quality. ■ For CCTV cameras, the quality has four levels: SUPER BEST, BEST, HIGH and NOTMAL. |
| BITRATE | It is used to set the upper limit of the transmission number per second. The value could be configured from 256 up to 8192 depending on the DVR model you have. The value set here is related to the image size. For example, here are the recommended values: <ul style="list-style-type: none"> ■ FHD(1080P) => 2048 ■ HD(720P) => 1024 The more the value, the bigger the file size, but the system stability might go down. The less the value, the smaller the file size, but the image quality might go down. |
| G.O.V | "Group of VOPs" is used to configure the length of G.O.V. The greater of the value, the less the bandwidth for transmission, and the poorer the image quality. |

6.1.2 TIME SETUP

| QUICK START | |
|-------------------|--------------------------------|
| GENERAL | DATE 2009 / NOV / 17 |
| TIME SETUP | TIME 15 : 35 : 53 |
| DAYLIGHT | NTP SERVER tock.stdtime.gov.tw |
| EaZy | FORMAT Y/M/D |
| | SYNC PERIOD DAILY |
| | GMT (GMT+08:00)TAIPEI |
| EXIT | |

1) DATE

Set the current date. The default display format is YEAR – MONTH – DATE (**Y-M-D**).

2) TIME

Set the current time in HOUR : MIN : SEC.

3) NTP SERVER

Click to change the default NTP server to another server they're familiar with, or keep the default NTP server.

Note: This function works only when this device is configured to the Internet.

4) FORMAT

Select one date format from the following three options: **Y/M/D**, **M/D/Y** or **D/M/Y**.

5) SYNC PERIOD

Select to synchronize the time every day (**DAILY**), or turn this function off (**OFF**).

6) GMT

Select your time zone.

6.1.3 DAYLIGHT

| QUICK START | |
|-----------------|--------------------|
| GENERAL | DAYLIGHT SAVING ON |
| TIME SETUP | START TIME |
| DAYLIGHT | 1ST MON AUG 06:00 |
| EaZy | END TIME |
| | LAST MON OCT 10:00 |
| | ADJUST 01:00 |
| EXIT | |

Depending on the time zone you're in:

1) DAYLIGHT SAVING

Select to enable (**ON**) or disable (**OFF**) this function.

2) START TIME / END TIME

Set the start time and end time.

3) ADJUST

Set the time in HOUR : MIN.

6.1.4 EaZy

EaZy Networking is a cloud service to connect your devices to the Internet automatically through our free mobile app, EagleEyes, in a few steps without going through the complicated network setup including port forwarding.

You'll see either of the following displays for EaZy. For details, please refer to "APPENDIX 7 EAZY NETWORKING" at page 74.

Type 1 ("EaZy" on EagleEyes)

Type 2 (Both "EaZy" and "QR Code" on EagleEyes)

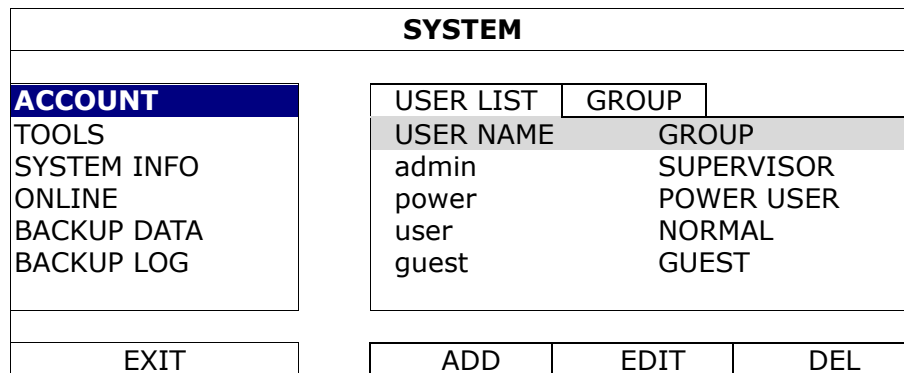

6.2 SYSTEM

6.2.1 ACCOUNT

USER LIST

This function is used to create a new user account, or modify or delete an existing account for different access privilege.

Note: For details about available local operations of each user level, please refer to "5.2 User Level Creation" at page 15.

■ How to create an account

Select **ADD**, enter a user name and its password, and assign a user group in which includes the access rights you wish to grant to this new account. Then, select **SAVE** to create and return to the user list page.

GROUP

This function is used to create a new group with customized user access rights for different functions if needed, and you can create a user account and assign it to your customized group.

Note: The default user groups are **SUPERVISOR**, **POWER USER**, **USER** and **GUEST**, and they're not allowed to be removed. For details about available local operations of each user group, please refer to "5.2 User Level Creation" at page 15.

| SYSTEM | | | | | | |
|---|--|---|------|----------|---------------------|---|
| ACCOUNT | USER LIST | GROUP | | | | |
| | | GENERAL | LIVE | PLAYBACK | NETWORK LIVE STREAM | NETWORK PLAYBACK STREAM |
| TOOLS SYSTEM INFO ONLINE BACKUP DATA BACKUP LOG | <input type="checkbox"/> + <input type="checkbox"/> - 🔒 SUPERVISOR 🔒 POWER USER 🔒 USER 🔒 GUEST | BACKUP PTZ CONTROL POWER CONTROL REVIEW LOG CONFIG SETUP CLEAR LOG ACCOUNT SETUP CLEAR HDD PUSH VIDEO PUSH STATUS ALARM OUT | | | | ALL ENABLE ENABLE ENABLE ENABLE DISABLE DISABLE DISABLE DISABLE ENABLE |
| | EXIT | | | | | |

■ How to create a group and customize access rights

Step1: Enter a name in the column next to **+**, and select **+** to create a group. You'll find it added in the group list.

Step2: Select the group you just added in the group list, and select the tabs of **GENERAL**, **LIVE**, **PLAYBACK**, **NETWORK LIVE STREAM** and **NETWORK PLAYBACK STREAM** to choose the corresponding functions you want to enable or disable.

Step3: Return to **USER LIST**, and create an account or modify an existing account to assign it to the group you just added.

6.2.2 TOOLS

| SYSTEM | | |
|--------------|---------------------------|-----------|
| ACCOUNT | LANGUAGE | ENGLISH ▾ |
| TOOLS | UPGRADE | SUBMIT |
| SYSTEM INFO | NETWORK UPGRADE | SUBMIT |
| ONLINE | BACKUP CONFIG | SUBMIT |
| BACKUP DATA | RESTORE CONFIG | SUBMIT |
| BACKUP LOG | UPGRADE CAMERA PARAMETERS | UPGRADE |
| | UPGRADE CAMERA FIRMWARE | UPGRADE |
| | ENABLE AUTO PLUG AND PLAY | ON |
| | BIND MAC ADDRESS | ON |
| EXIT | | |

1) LANGUAGE

Select the language of the OSD.

2) UPGRADE

Save the upgrade files obtained from your installer or distributor in a compatible USB flash drive, and insert it into the USB port at the front panel. Then, click **SUBMIT** to start upgrading.

Note: Before using the USB flash drive, please use your PC to format the USB flash drive to FAT32 format first. For the list of compatible USB flash drives, please refer to "APPENDIX 5 COMPATIBLE USB FLASH DRIVE LIST" at page 69.

Note: After upgrading firmware, it's recommended to clear all HDD data for the system to work more stably. Before clearing all HDD data, please remember to make video backup.

3) NETWORK UPGRADE

Click **SUBMIT** for perform system upgrade via Internet.

Note: This function requires Internet access. Please make sure this recorder is connected to Internet before using this function.

4) BACKUP CONFIG / RESTORE CONFIG

To save the DVR current configurations for later use, such as restoring after DVR upgrade or applying to another DVR, insert a compatible USB flash drive into the USB port, and select **SUBMIT** in **BACKUP CONFIG** to copy the current DVR configurations to a file "System.bin" and save to your USB flash drive. To restore the DVR configurations, insert the USB flash drive including "System.bin" to the USB port, and select **SUBMIT** in **RESTORE CONFIG**.

5) UPGRADE CAMERA PARAMETERS / UPGRADE CAMERA FIRMWARE

This function is used only to upgrade the parameters / firmware of our brand's HD CCTV camera when necessary. Get the upgrade file from our installer or distributor and save it to a USB flash drive. Then, select **UPGRADE** to start the upgrade.

6) ENABLE AUTO PLUG AND PLAY

Switch to **ON** allow the camera to be detected and configured automatically when it's connected to this device.

Note: This function is available only when the brand of the cameras connected is the same as this device.

7) BIND MAC ADDRESS

This function is recommended to be used when your surveillance system is more than 256 cameras. It would be helpful for the system to get the address of each connected camera quickly if the system accidentally shuts down and needs to recover.

6.2.3 SYSTEM INFO

| SYSTEM | |
|--------------------|-----------------------------|
| ACCOUNT | BAUD RATE 2400 |
| TOOLS | HOST ID 000 |
| SYSTEM INFO | R.E.T.R 5 |
| ONLINE | AUTO KEY LOCK(S) NEVER |
| BACKUP DATA | CLEAR HDD HDD-0 |
| BACKUP LOG | RESET DEFAULT SUBMIT |
| | REMOTE CONTROL ID 000 |
| | DEVICE TITLE office |
| | VIDEO FORMAT AUTO |
| | SERIAL TYPE RS485 |
| | VIDEO FORMAT NTSC |
| | VERSION 1001-1000-1000-1001 |
| EXIT | |

1) BAUD RATE

Set the baud rate of the DVR (**2400 / 4800 / 9600 / 19200 / 38400 / 57600 / 115200**).

Note: This function is used when an external controller is connected to this DVR and further configurations should be made for this DVR to work with the controller. For details, please check the user manual of the external controller.

2) HOST ID

Set the ID of the DVR (000 ~ 254).

Note: This function is used when an external controller is connected to this DVR and further configurations should be made for this DVR to work with the controller. For details, please check the user manual of the external controller.

3) R.E.T.R (Remote Event Trigger Recording)

Select the timeout in minute after which the R.E.T.R. function will be activated (**3 / 5 / 10 / 30**).

4) AUTO KEY LOCK(S)

Set the time-out in second after which the key lock function is activated (**NEVER / 30 / 60 / 120**).

5) CLEAR HDD

Select the HDD you want to clear, and click **YES** to confirm or **NO** to cancel.

It's recommended to clear all data in the hard disk when:

- It's the first time to use this DVR to ensure the recorded data are not mixed with other data previously saved in the same hard disk.
- The DVR firmware is upgraded for the system to work more stably. Before clearing all HDD data, please remember to make video backup.
- DVR date and time are changed accidentally when the recording function is activated. Otherwise, the recorded data will be disordered and you will not be able to find the recorded file to backup by time search.

6) RESET DEFAULT

Click "SUBMIT" to reset all settings as default, and select **YES** to confirm or **NO** to cancel. The DVR will reboot after reset.

7) REMOTE CONTROL ID

This function is available when users need to control two or more DVRs with one IR remote controller. The ID set here is used to identify the DVR the remote controller is going to control. Please also read the user manual of the IR remote controller for details.

8) DEVICE TITLE

Enter a title for this device.

9) VIDEO FORMAT

Allow the DVR to detect the video format automatically (**AUTO**), or choose **NTSC** or **PAL** manually.

10) SERIAL TYPE

Here shows the serial type of the DVR (**RS-485**).

11) VIDEO FORMAT

Here shows the information of the DVR video format (**NTSC / PAL**).

12) VERSION

Here shows the firmware version information.

6.2.4 ONLINE

Insert a compatible USB flash drive to the USB port at the front panel.

Note: Before using your USB flash drive for video backup, please format it to "FAT32" first with your PC or laptop. For the list of compatible USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST" at page 69.

| SYSTEM | | |
|---------------|-----------------------------|------------|
| ACCOUNT | ANONYMOUS VIEWER LOGIN | OFF |
| TOOLS | DROP ALL VIDEO CONNECTION | SUBMIT |
| SYSTEM INFO | LOGIN FAILURE NUMBER | 3 ▾ |
| ONLINE | LOCK TIME OF LOGIN FAILURES | 1 MIN ▾ |
| BACKUP DATA | | |
| BACKUP LOG | | |
| EXIT | | |

1) ANONYMOUS VIEWER LOGIN

Switch to **ON** to allow anonymous login, meaning there's no need to enter user name and password for remote access.

2) DROP ALL VIDEO CONNECTION

Click **SUBMIT** to force disconnection of all remote logins when needed.

3) LOGIN FAILURE TIMES

Select how many times of remote login failures (1 ~ 20) to enable device lock automatically for security reasons.

4) LOCK TIME FOR LOGIN FAILURES

Select the device lock time (**1 MIN / 2 MINS / 3 MINS / 5 MINS / 10 MINS / 30 MINS / 1 HOUR**) when remote login failures reach to the number specified in **LOGIN FAILUTRE TIME(S)**. You'll be unable to see the login page of this device until the specified time is up.

6.2.5 BACKUP DATA

Note: It's **NOT** allowed to remove the hard disk installed in the DVR and connect it directly to your PC to check video footage. It might impair the files saved in the hard disk, causing the loss of those files even when the disk is replaced back to the DVR.

Note: This function is available only when a hard disk is installed.

Insert a compatible USB flash drive to the USB port at the front panel.

Note: Before using your USB flash drive for video backup, please format it to "FAT32" first with your PC or laptop. For the list of compatible USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST" at page 69.

| SYSTEM | |
|--------------------|---|
| ACCOUNT | START DATE 2009/NOV/19 |
| TOOLS | START TIME 08:30:21 |
| SYSTEM INFO | END DATE 2009/NOV/19 |

| | BACKUP SUBMIT |
| | REQUIRE SIZE: 554MB SUBMIT |
| EXIT | AVAILABLE SIZE: 3788.0MB |

1) START DATE / START TIME

Select the start date & time.

2) END DATE / TIME

Select the end date & time.

3) CHANNEL

Click to select the channel(s).

4) HARD DISK

Select the hard disk containing the video data you need or **ALL HDD**.

5) OUTPUT FILE FORMAT

Select the file format for backup video: **DEFAULT** or **AVI**.

- When **DEFAULT** is selected, the copied video is saved to ".dv5", and you can only open it with our own video player on PC. For details, please check the next section, "Video Playback on PC (.dv5)".

Note: It's recommended to save the file to the default format for security reasons. Only specific video player supports the default format and not everyone can see the video footage.

- When **AVI** is selected, the copied footage will be converted to ".avi", and you can open it with any media player which supports the ".avi" format on PC.

6) TARGET DEVICE

Select the device you want to use for video backup: **USB DEVICE**.

7) BACKUP

Click **SUBMIT** to start backup.

8) REQUIRE SIZE

To know the size of the expected backup video before backup, click **SUBMIT** to start calculating.

Video Playback on PC (.dv5)

For video backup with the format ".dv5", you can only use our own player to play.

Note: It's **NOT** allowed to remove the hard disk installed in the DVR and connect it directly to your PC to check recorded video clips. It might impair the files saved in the hard disk, causing the loss of those files even when the disk is replaced back to the DVR.

To play ".dv5" video on your PC:

Step1: Insert the USB flash drive with recorded data into your PC.

Note: The supported PC operating systems are Windows 10, Windows 8, Windows 7, Windows Vista & Windows XP.

Step2: Find the program "PLAYER.EXE" in the USB flash drive, and double-click it to install.

Note: "PLAYER.EXE" can also be downloaded from www.surveillance-download.com/user/z2116.swf.

Step3: Run the program, *VideoPlayer*, and browse to where you save the recorded data.

Step4: Select the file you want to start video playback.

Convert the file format to AVI:

To convert the video file format to AVI, click **AVI** from the playback panel to start file conversion.

Note: The recorded audio (if any) will be removed when the file format is converted to AVI.

Note: If the footage includes data for multiple channels, click to a specific channel for this function to work properly.

6.2.6 BACKUP LOG

This function is used to export event logs for quick checking or backup. A .csv file will be exported to your USB flash drive. You can open it with a text editor to see the logs.

Note: This function is available only when a hard disk is installed.

Insert a compatible USB flash drive to the USB port at the front panel.

Note: Before using the USB flash drive, please use your PC to format the USB flash drive to FAT32 format first. For the list of compatible USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST" at page 69.

| SYSTEM | | |

| EXIT | | |

- 1) START DATE / START TIME
Select the start date & time.
- 2) END DATE / TIME
Select the end date & time.
- 3) CHANNEL
Click to select the channel(s).

4) DATA TYPE

Click "SETUP" to select the event type you want: **MANUAL / MOTION / ALARM / SYSTEM / TIMER / HUMAN DETECTION / INFLOW / OUTFLOW / VIRTUAL FENCE / ONEWAY / SENCE CHANGE**, or select **ALL** to choose all event types.

Note: The event types available depend on the model you have.

5) BACKUP

Click **SUBMIT** to start backup. You'll see a log file (.csv) in the flash drive. You may open it with any txt editor, such as NotePad.

6.3 EVENT INFORMATION

6.3.1 QUICK SEARCH

The screenshot displays the 'EVENT INFORMATION' interface. On the left is a sidebar with 'QUICK SEARCH' highlighted, and other options 'HDD INFO' and 'EVENT LOG'. The main area shows 'CHANNEL' set to '2 SELECTED'. Below this is a calendar for the year '2009' and month 'NOV'. The date '23' is highlighted in the calendar grid. Below the calendar is a time scale bar from 00 to 24, with '15:20' highlighted. At the bottom are 'EXIT' and 'SUBMIT' buttons.

Step1: Select the channel including the video data you want to search.

Step2: Select the year and month including the video data you want to search from the calendar, and the date with recorded data will be highlighted.

Note: To select the year and month, move your mouse to the display bar. Then, click and hold to drag up or down.

Step3: Select the date you want from the calendar, and the time with recorded data will be highlighted from the time scale bar.

Step4: To immediately play the video clip, click **SUBMIT**.

To choose the start time for video playback, move your mouse cursor to the highlighted time, and click to confirm the time when the time display below is the time you want. The video playback is activated right away when you confirm the time.

Note: For video playback operations, please refer to "5.4 Playback" at page 19.

6.3.2 HDD INFO

You can check the remaining capacity of the connected hard disk in this device and its current status.

If the healthy status goes to:

- **GOOD** - This hard disk works normal.
- **BELOW AVERAGE** - The hard disk might work with some errors. Please pay attention and do video backup if needed.
- **REPLACEMENT NEEDED** – Please replace this hard disk immediately to ensure continuous video recording.

| EVENT INFORMATION | | | | | | | | | |
|-------------------|-------|--------|--------|-----------|-------|---------------|-----------|-------------------------|----------------|
| QUICK SEARCH | ID | TYPE | STATUS | SIZE | TEMP. | SERIAL NUMBER | FREE SIZE | FORMAT TIME | HEALTHY STATUS |

| | POWER ON | 2009/NOV/19 15:32:02 | |
| | PREV | NEXT | CLEAN |
| EXIT | | | |

6.4 ADVANCED CONFIG

6.4.1 CAMERA

| ADVANCED CONFIG | | | | |
|-----------------|---|-----|-----|-----------|
| CAMERA | CH1 | CH2 | CH3 | CH4 |
| DETECTION | INTERFACE | | | COAXIAL ▾ |
| ALERT | CAMERA TYPE <i>(Appears only when INTERFACE is COAXIAL)</i> | | | AUTO ▾ |
| NETWORK | BRIGHTNESS | | | 128 |
| DISPLAY | CONTRAST | | | 128 |
| RECORD | SATURATION | | | 128 |
| DEVICES | HUE | | | 128 |
| DCCS | REC | | | ON |
| IVS | TIME STAMP DISPLAY | | | ON |
| NOTIFY | CHANNEL TITLE | | | CH1 |
| JOYSTICK | REC AUDIO | | | ON |
| | ALARM OUT DURATION (SECS) <i>(For selected models only)</i> | | | 3 |
| | CONNECTION <i>(Appears only when INTERFACE is IPCAM)</i> | | | SETUP |
| EXIT | | | | |

1) INTERFACE

Here shows how the camera is connected to this device: **COAXIAL** or **IPCAM**.

Usually this function will be detected automatically unless you want to change the camera type from an IP camera to an analog camera.

If an IP camera was previously connected and now you want to replace it with an analog camera, please manually change **IPCAM** to **COAXIAL** for the camera detection to work properly.

2) CAMERA TYPE *(Appears only when INTERFACE is COAXIAL)*

When **INTERFACE** is **COAXIAL**, you'll see **CAMEA TYPE** and the options are **AUTO** (default) / **TVI** / **ANALOG HD**.

3) BRIGHTNESS / CONTRAST / SATURATION / HUE *(Appears only when INTERFACE is COAXIAL)*

Click the current value to manually adjust the brightness/contrast/saturation/hue of each channel here.

4) REC

Select if you want to enable recording for the selected channel (**ON** / **OFF**).

Note: When this function is disabled, no manual, event or timer recording will be activated even if any of these three record functions is set to **ON**.

5) TIME STAMP DISPLAY

Enable this function and the recording time will be shown on the video during video playback.

6) CHANNEL TITLE

Click the channel title column to change the channel title (up to 12 characters). The default title is the channel number.

7) REC AUDIO

Enable or disable audio recording for the selected channel if the connected camera supports audio recording.

8) ALARM OUT DURATION (SECS) *(For selected models only)*

Select the duration time in second when an alarm-out event occurs (**3** / **5** / **10** / **20** / **30**).

9) **CONNECTION** *(Appears only when INTERFACE is IPCAM)*

When **INTERFACE** is **IPCAM**, you'll see **CONNECTION** to further configure the IP camera.

| CONNECTION – CH1 | |
|--------------------|--------------|
| VENDOR | ONVIF |
| MODEL | |
| STREAM PROTOCOL | RTP-Unicast |
| METHOD | HTTP |
| URI | 182.168.1.10 |
| PORT | 88 |
| SUB STREAM PATH | |
| RECORD STREAM PATH | |
| USER NAME | test |
| PASSWORD | test |
| CACHE TIME (MSEC) | 0 5 20 |

6.4.2 DETECTION

| ADVANCED CONFIG | | | | |
|------------------|--|-----|-----|-------|
| CAMERA | CH1 | CH2 | CH3 | CH4 |
| DETECTION | LS | | | 07 |
| ALERT | SS | | | 03 |
| NETWORK | TS | | | 02 |
| DISPLAY | MOTION | | | OFF |
| RECORD | ALARM | | | OFF |
| DEVICES | AREA | | | EDIT |
| DCCS | PRIVACY MASK | | | EDIT |
| IVS | INTERNAL ALARM <i>(For selected models only)</i> | | | ON |
| NOTIFY | CAMERA GUARD | | | SETUP |
| JOYSTICK | | | | |
| EXIT | | | | |

1) LS (Level of Sensitivity)

LS is to set the sensitivity of comparing two different images. The smaller the value is, the higher sensitivity for motion detection. The highest sensitivity setting is 00, and the lowest sensitivity setting is 15. The default value is 07.

2) SS (Spatial Sensitivity)

SS is to set the sensitivity for detecting the size of one object (the number of the grids) on the screen. The smaller the value is, the higher sensitivity for motion detection.

The highest sensitivity setting is 00, and the lowest sensitivity setting is 15. The default setting is 03.

Note: The default setting of SS is 03, which means once an object is detected more than 3 grids, the system will get triggered. So the value of SS must be less than the number of grids that you set up for the motion detection area.

3) TS (Time of Sensitivity)

TS is to set the sensitivity regarding how long one object stays in the detection area and triggers the recording. The smaller the value is, the higher sensitivity for motion detection.

The highest sensitivity setting is 00, and the lowest sensitivity setting is 15. The default setting is 02.

4) MOTION

Select if you want to activate the motion detection function for the selected channel (**ON** / **OFF**).

5) ALARM

Select **N.C.** / **N.O.** depending on your installation need. The default alarm value is **OFF**.

6) AREA

Click **EDIT** to set the motion detection area.

There are 16 × 12 grids per camera for all channels. Pink blocks represent the area that is not being detected while the transparent blocks are the area under detection.

7) PRIVACY MASK

You can cover certain areas on the camera image with privacy masks.

Note: Up to 4 areas could be added.

| PRIVACY MASK | | | |
|--------------|----------|---|--------------|
| NAME | FUNCTION | MOSAIC COLOR | TRANSPARENCY |
| 1 | OFF |  | 0% |
| 2 | ON |  | 25% |
| 2 | OFF |  | 0% |
| 2 | OFF |  | 0% |

Select one existing profile, and choose **EDIT** to modify it.

■ EDIT

| PRIVACY MASK - EDIT | |
|---------------------|--|
| FUNCTION | ON |
| MOSAIC COLOR |  |
| TRANSPARENCY | 50% |
| MASK AREA | SETUP |

| Item | Description |
|--------------|---|
| MOSAIC SIZE | Choose the mosaic size of the privacy mask. The options are: 8x8, 32x32, and 64x64. |
| MOSAIC COLOR | Select the color for the privacy mask. |
| TRANSPARENCY | Select the transparency for your privacy mask. The options are: 0%, 25%, 50%, and 100%. |
| MASK AREA | Select "SETUP" to enter the area selection page. To exit, right click on the mouse. |

8) INTERNAL ALARM *(For selected models only)*

This function is available only when an HD CCTV camera with a PIR sensor built-in is connected to this device. You could enable or disable the PIR detection here.

Note: To know which camera could work with this function, please check with your installer or distributor.

9) CAMERA GUARD

This function is available only for the camera which supports motorized-pan. It will temporarily disable the pan function of the camera and move the camera angle to a preset area for surveillance when **Guard** is enabled on the mobile app, EagleEyes, remotely.

To use this function, you need to at least have one preset point and preset group configured on your camera, and have the mobile app, EagleEyes, installed on your mobile device.

Note: To know how to configure preset points and preset groups, please refer to the user manual of your camera. To know where to download the app, EagleEyes, please refer to "7.2 Mobile Devices" at page 62.

| CAMERA GUARD – CH1 | | |
|--------------------------------------|----|---|
| GUARD LOCK | ON | |
| TIMEOUT (SECS) | 30 | ▼ |
| PRESET GROUP | 1 | ▼ |
| PRESET NUMBER | 3 | ▼ |
| <input type="button" value="APPLY"/> | | |

Enable **GUARD LOCK**, choose the preset group and point you want to monitor, and configure the timeout after which the camera will be fixed to the selected point. Any attempt to pan the camera to another point will be failed when **GUARD** on the mobile app, EagleEyes, is enabled.

6.4.3 ALERT

| ADVANCED CONFIG | | |
|-------------------------------------|----------------------------------|------|
| CAMERA | EXT. ALERT | ON |
| DETECTION | INT. BUZZER | OFF |
| ALERT | KEY BUZZER | ON |
| NETWORK | VLOSS BUZZER | ON |
| DISPLAY | MOTION BUZZER | ON |
| RECORD | ALARM BUZZER | ON |
| DEVICES | HDD BUZZER | ON |
| DCCS | EVENT DURATION (SEC) | 10 ▼ |
| IVS | HDD NEARLY FULL (GB) | 5 ▼ |
| NOTIFY | HDD OVERHEAT ALERT (°C) | 70 ▼ |
| JOYSTICK | HDD OVERHEAT NOTIFICATION | ON |
| | HDD FAILURE BUZZER | ON |
| | VIDEO LOSS BUZZER DURATION (SEC) | 10 ▼ |
| | ALARM BUZZER DURATION (SEC) | 40 ▼ |
| <input type="button" value="EXIT"/> | | |

1) EXT. ALERT

Select to enable or disable the sound when any external alarm is triggered (**ON / OFF**).

2) INT. BUZZER

Select to enable or disable the sound (ON / OFF) for all internal buzzers: **KEY BUZZER, VLOSS BUZZER, MOTION BUZZER, ALARM BUZZER**, and **HDD BUZZER**.

Note: When this item is set to **OFF**, item 3) to item 7) will be disabled even though they are set to ON.

3) KEY BUZZER

Select to enable or disable the sound when pressing the buttons on the front panel (**ON / OFF**).

4) VLOSS BUZZER

Select to enable or disable the sound when video loss happened (**ON / OFF**).

5) MOTION BUZZER

Select to enable or disable the sound when any motion alarm is triggered (**ON / OFF**).

6) ALARM BUZZER

Select to enable or disable the sound when any internal alarm is triggered (**ON / OFF**).

7) HDD BUZZER

Select to enable or disable the sound (ON / OFF) when the HDD remaining capacity reaches to the value set in **HDD NEARLY FULL (GB)**.

8) EVENT DURATION (SEC)

Select the duration time for alarm buzzer in second (**5 / 10 / 20 / 40**).

9) HDD NEARLY FULL (GB)

If **HDD BUZZER** is enabled, select the duration time for buzzer notifications when the hard disk available capacity is 5/10/15/20 GB left.

10) HDD OVERHEAT ALERT (°C)

Select the temperature alert for your hard disk to be aware of the possible overheat of your hard disk.

11) HDD OVERHEAT NOTIFICATION

Select to enable or disable the alert when your hard disk temperature reaches the temperature you specified in **HDD OVERHEAT ALERT (°C)**.

12) HDD FAILURE ALERT

Select to enable or disable the sound when any of the installed hard disk(s) fails to work normally (**ON / OFF**).

13) VIDEO LOSS BUZZER DURATION (SEC)

Select the duration time for video loss buzzer in second (**5 / 10 / 20 / 40 / CONTINUOUS**).

14) ALARM BUZZER DURATION (SEC)

Select the duration time for the alarm buzzer in second (**5 / 10 / 20 / 40 / CONTINUOUS**).

6.4.4 NETWORK

NETWORK

- **WAN** is used to connect this recorder to Internet for remote access from anywhere as long as Internet access is available.
- **DDNS** is used when the Internet access is available.

Note: For more details about these two functions and network configurations, please click [here](#) get the setup manual.

| ADVANCED CONFIG | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

- 1) SMTP SERVER
Enter the SMTP server address provided from your e-mail system supplier.
- 2) PORT
Enter the port number provided from your e-mail system supplier. If this column is left blank, the e-mail server will use port 25 to send e-mails.
- 3) MAIL FROM
Enter the email address which will be used to send Email notifications.
- 4) SSL ENCRYPTION
Select **ON** if your e-mail server is using SSL encryption to protect your e-mail content from unauthorized access.
- 5) VERIFY PASSWORD
Some mail servers are required to verify the password. Please enter the “user name” and “password”.
- 6) USER NAME / PASSWORD
Enter the “user name” and “password” to access the email address entered in **MAIL FROM** when **VERIFY PASSWORD** is set to **ON**.

PROTOCOL

| ADVANCED CONFIG | | | | | |
|---|--------------------|--------|------|----------|------|
| CAMERA DETECTION ALERT | WAN | E-MAIL | DDNS | PROTOCOL | EaZy |
| NETWORK | TCP PAYLOAD LENGTH | | 8192 | | |
| DISPLAY RECORD DEVICES DCCS IVS NOTIFY JOYSTICK | UDP PAYLOAD LENGTH | | 1200 | | |
| EXIT | | | | | |

- 1) TCP PAYLOAD LENGTH / UDP PAYLOAD LENGTH
Configure the payload length from 100 ~ 10000.
The higher the value, the larger data packet is carried, and the longer time is needed for the video to display.
The lower the value, the less data packet is carried, and the more possibility you might see video lag.

EaZy

This function is used to connect this recorder to Internet by using EaZy Networking. You'll see either of the following displays for EaZy. For details, please refer to “APPENDIX 9 EAZY NETWORKING” at page 74.

Type 1 (“EaZy” on EagleEyes)

| WAN | E-MAIL | DDNS | PROTOCOL | EaZy |
|---|--------|------|----------|------|
| ENABLE EAZY NETWORKING | | | | ON |
|  000E532B8613 | | | | |

Type 2 (Both “EaZy” and “QR Code” on EagleEyes)

| WAN | E-MAIL | DDNS | PROTOCOL | EaZy |
|---|--------|------|----------|------|
| ENABLE EAZY NETWORKING | | | | ON |
| MAC: 000E53ECA7B4 | | | | |
| UUID: e736dcbf-d4bb-4ca8-86fd-62658e2ecec1 | | | | |
| PORT: 80 | | | | |
|  | | | | |

6.4.5 DISPLAY

| ADVANCED CONFIG | | | | | | | | | | | | |
|---|---|--|----|---|----|---|----------------|---|------|---|-------------|---|
| CAMERA DETECTION ALERT NETWORK DISPLAY RECORD DEVICES DCCS IVS NOTIFY JOYSTICK | FULL SCREEN DURATION QUAD SCREEN DURATION <i>(For selected models only)</i> HDD DISPLAY MODE HDMI RESOLUTION VGA RESOLUTION SPOT MONITOR | <table border="1"> <tr> <td>03</td> <td>▼</td> </tr> <tr> <td>03</td> <td>▼</td> </tr> <tr> <td>REMAINING SIZE</td> <td>▼</td> </tr> <tr> <td>AUTO</td> <td>▼</td> </tr> <tr> <td>1920 X 1080</td> <td>▼</td> </tr> </table> SETUP | 03 | ▼ | 03 | ▼ | REMAINING SIZE | ▼ | AUTO | ▼ | 1920 X 1080 | ▼ |
| 03 | ▼ | | | | | | | | | | | |
| 03 | ▼ | | | | | | | | | | | |
| REMAINING SIZE | ▼ | | | | | | | | | | | |
| AUTO | ▼ | | | | | | | | | | | |
| 1920 X 1080 | ▼ | | | | | | | | | | | |
| EXIT | | | | | | | | | | | | |

1) FULL SCREEN DURATION

Select the full screen dwell duration time in second (**03 / 05 / 10 / 15**).

2) QUAD SCREEN DURATION *(For selected models only)*

Select the quad screen dwell duration time in second (**03 / 05 / 10 / 15**).

3) HDD DISPLAY MODE

Select **REMAINING SIZE** to show the remaining HDD capacity for recording, **REMAINING TIME** to show the remaining recording time, or **DAYS KEPT** to show how many recording data are saved in day.

4) HDMI RESOLUTION

Select the display resolution you want. The default value is **AUTO**. This is used for the main display output.

Note: To have the best image quality on your monitor, make sure (1) the selected DVR output resolution is supported by your monitor, and (2) the output settings on both the LCD monitor and DVR are consistent.

If the image is not positioned or scaled properly, please go to your monitor’s menu for adjustment. For details, please refer to the user manual of your monitor.

Note: When the 4K resolution, 3840 x 2160, is selected, the VGA output will be disabled.

5) VGA RESOLUTION

Select the display resolution you want. The options are 1920 x 1080 / 1280 x 720 / 1024 x 768.

Note: To have the best image quality on your monitor, make sure (1) the selected DVR output resolution is supported by your monitor, and (2) the output settings on both the LCD monitor and DVR are consistent.

If the image is not positioned or scaled properly, please go to your monitor’s menu for adjustment. For details, please refer to the user manual of your monitor.

Note: When the 4K resolution, 3840 x 2160, is selected, the VGA output will be disabled.

6) SPOT MONITOR

Specify how VGA / composite port is used for video output: **CALL MONITOR / EVENT MONITOR / LIVE**.

Note: For some models, only the composite port supports this function. The available output options are depending on the model you have.

- **CALL MONITOR** is used for sequence display. When this option is selected, go to “**CALL SCREEN DURATION**” to select the duration time in second (**03 / 05 / 10 / 15**) and “**CALL MONITOR PERMIT**” to choose the channel(s) you want for sequence display.

| SPOT MONITOR | | |
|----------------------|--------------|---|
| SPOT MONITOR | VGA | ▼ |
| SPOT DISPLAY | CALL MONITOR | ▼ |
| CALL SCREEN DURATION | 5 | ▼ |
| CALL MONITOR PERMIT | 4 selected | ▼ |

- **EVENT MONITOR** is used when any alarm event occurs. When this option is selected, go to “**LAYOUT**” to select how many channels you want to see, and “**PRE-ALARM (SEC)**” and “**POST-ALARM (SEC)**” to set how many seconds you’d like to see before (**0 ~ 5**) and after (**3 ~ 10**) the event starts.

| SPOT MONITOR | | | | | | |
|---|---------------|---|--|--|--|--|
| SPOT MONITOR | VGA | ▼ | | | | |
| SPOT DISPLAY | EVENT MONITOR | ▼ | | | | |
| LAYOUT | 4 | ▼ | | | | |
| PRE-ALARM (SEC) | 3 | ▼ | | | | |
| POST-ALARM (SEC) | 5 | ▼ | | | | |
| <table border="1" style="width: 100%; height: 100px;"> <tr> <td style="width: 50%;"></td> <td style="width: 50%;"></td> </tr> <tr> <td style="width: 50%;"></td> <td style="width: 50%;"></td> </tr> </table> | | | | | | |
| | | | | | | |
| | | | | | | |

- **LIVE** is used to select how many channels you’d like to show on the spot monitor. You can have up to 7 layout patterns saved in PROFILE. For example, if you choose “2” in “PROFILE” and the layout is “4” with 4 channels selected, this layout setting will be saved in PROFILE 2.

| SPOT MONITOR | | | | | | |
|---|------------------------------------|---|------------------------------------|------------------------------------|------------------------------------|------------------------------------|
| SPOT MONITOR | VGA | ▼ | | | | |
| SPOT DISPLAY | LIVE | ▼ | | | | |
| PROFILE | 1 | ▼ | | | | |
| LAYOUT | 4 | ▼ | | | | |
| <table border="1" style="width: 100%; height: 100px;"> <tr> <td style="width: 50%; text-align: center;"> <input type="text" value="CH1"/> ▼ </td> <td style="width: 50%; text-align: center;"> <input type="text" value="CH3"/> ▼ </td> </tr> <tr> <td style="width: 50%; text-align: center;"> <input type="text" value="CH5"/> ▼ </td> <td style="width: 50%; text-align: center;"> <input type="text" value="CH8"/> ▼ </td> </tr> </table> | | | <input type="text" value="CH1"/> ▼ | <input type="text" value="CH3"/> ▼ | <input type="text" value="CH5"/> ▼ | <input type="text" value="CH8"/> ▼ |
| <input type="text" value="CH1"/> ▼ | <input type="text" value="CH3"/> ▼ | | | | | |
| <input type="text" value="CH5"/> ▼ | <input type="text" value="CH8"/> ▼ | | | | | |

6.4.6 RECORD

Note: Please DO NOT change the date or time of your DVR after the recording function is activated. Otherwise, the recorded data will be disordered and you will not be able to find the recorded file to backup by time search. If users change the date or time accidentally when the recording function is activated, it's recommended to clear all HDD data, and start recording again.

| ADVANCED CONFIG | | |
|-----------------|------------------------|------------------------------|
| CAMERA | MANUAL RECORD | ON |
| DETECTION | EVENT RECORD | ON |
| ALERT | TIMER RECORD | ON |
| NETWORK | PRE-ALARM RECORD | ON |
| DISPLAY | OVERWRITE | ON |
| RECORD | KEEP DATA LIMIT (DAYS) | OFF <input type="checkbox"/> |
| DEVICES | RECORD CONFIG | SETUP |
| DCCS | SUBSTREAM RESOLUTION | CIF <input type="checkbox"/> |
| IVS | | |
| NOTIFY | | |
| JOYSTICK | | |
| EXIT | | |

- 1) MANUAL RECORD
Set the manual recording function on / off.
- 2) EVENT RECORD
Set the event recording function on / off.
- 3) TIMER RECORD
Set the timer recording function on / off.
- 4) PRE-ALARM RECORD
Select to enable or disable the pre-alarm function (ON / OFF).
When pre-alarm and event recording functions are both activated, the DVR will record 8MB data before an alarm / motion event is triggered.
- 5) OVERWRITE
Select **ON** to overwrite previous recorded data in your hard disk when the hard disk is full. When this function is on and the hard disk is full, the DVR will clear 8GB data from the oldest for continuous recording without notice.
- 6) KEEP DATA LIMITS (DAYS)
Assign how many days to save the recording data from **1** to **31** days. After the assigned day(s), the recorded data will be removed. Select **OFF** to disable this function.
- 7) RECORD CONFIG
Click **SETUP** to enter the setting page individually for manual record, event record and timer record. For details, please refer to "6.1.1 GENERAL" at page 23.
- 8) SUBSTREAM RESOLUTION
Select the resolution for sub-streams: **FRAME** / **CIF**.
Sub-streams are used for remote surveillance from a PC or mobile device. When the bandwidth is low, choose a lower resolution helps to quickly view the video, but the video quality might get low.

6.4.7 DEVICES

Note: This function is used when the DVR supports RS485 connection, and you want to connect other brand's speed dome camera.

| ADVANCED CONFIG | |
|---|--|
| CAMERA DETECTION ALERT NETWORK DISPLAY RECORD DEVICES DCCS IVS NOTIFY JOYSTICK EXIT | CH1 CH2 CH3 CH4 |
| | DEVICE PTZ <input type="checkbox"/> |
| | ID 00 |
| | PROTOCOL NORMAL <input type="checkbox"/> |
| | RATE 2400 <input type="checkbox"/> |
| | INTERFACE RS485 <input type="checkbox"/> |
| | |
| | |
| | |
| | |

1) DEVICE

For connecting other brand's speed dome camera, select **PTZ**.

2) ID

Click the current value to set the ID number (0 ~ 255) for the connected camera if necessary.

Make sure the ID setting of the camera is the same as the setting here, or the DVR will not be able to control the device.

Note: To know the default ID of the speed dome camera, please refer to its user manual.

3) PROTOCOL

Select **NORMAL** (our protocol), **P-D** (PELCO-D), **P-P** (PELCO-P), **S-T** (SAMSUNG-T) or **S-E** (SAMSUNG-E) protocol.

4) RATE

Select the baud rate for the connected speed dome camera (**2400 / 4800 / 9600 / 19200 / 38400 / 57600 / 115200**).

Make sure the baud rate setting of the camera is the same as the setting here, or the DVR will not be able to control the device.

Note: To know the default baud rate of the speed dome camera, please refer to its user manual.

5) INTERFACE

Select **RS485** if the connected speed dome camera uses RS485 wires to transmit control signals.

6.4.8 DCCS

This function is used for our brand's HD CCTV camera series. Users could access the setup menu of the camera itself for further configurations.

| ADVANCED CONFIG | |
|---|-------------------|
| CAMERA DETECTION ALERT NETWORK DISPLAY RECORD DEVICES DCCS IVS NOTIFY JOYSTICK EXIT | CH1 CH2 CH3 CH4 |
| | OSD MENU SETUP |
| | DCCS MENU SETUP |
| | |
| | F.W. 1031 |
| | DEVICE AVT series |
| | CONNECTION OK |
| | |
| | |
| | |

1) OSD MENU

When the connected camera is properly recognized, click **SETUP** to enter the setup page of the camera itself.

2) DCCS MENU

This menu appears when the camera is properly recognized, and it is used to enter the additional function setup page designed for the connected camera.

Note: Functions additionally designed are not available for every HD CCTV camera. Please check the camera user manual for details.

6.4.9 IVS

Note: This function is for selected models only.

Note: Before using the IVS function, make sure the event record function is enabled on your DVR.

IVS, Intelligent Video Surveillance, is the advanced application for motion detection, but more precise and smarter. It can be applied to different situations with one of the following three modes: FLOW COUNTING, VIRTUAL FENCE, and ONE WAY.

When anyone crosses the detection line (virtual fence), the recording will be on.

Note: Four camera channels are supported for this function.

| ADVANCED CONFIG | | | |
|-----------------|--------------------|---------------|------|
| CAMERA | IVS1 | IVS2 | IVS3 |
| DETECTION | CAMERA | CH3 | ▼ |
| ALERT | IVS MODE | FLOW COUNTING | ▼ |
| NETWORK | DISPLAY LINE | OFF | ▼ |
| DISPLAY | SENSITIVITY | 7 | |
| RECORD | RESET COUNT | SUBMIT | |
| DEVICES | VIRTUAL FENCE AREA | SETUP | |
| DCCS | SCENE CHANGE | OFF | ▼ |
| IVS | SCENE CHANGE LEVEL | MIDDLE | ▼ |
| NOTIFY | | | |
| JOYSTICK | | | |
| EXIT | | | |

1) CAMERA

Select the camera channel that you want to use the IVS function.

2) IVS MODE

Select one of the following three modes depending on your environment:

| MODE | DESCRIPTION |
|---------------|---|
| FLOW COUNTING | A virtual detection line is set to detect the moving direction of pedestrians for flow counting. |
| VIRTUAL FENCE | A virtual detection line is set to detect intruders crossing the detection line, and an alarm will be triggered. |
| ONE WAY | A virtual detection line is set to detect intruders from the specified direction, and an alarm will be triggered. |

3) DISPLAY LINE

Select to display the detection line for IVS on the screen or not.

4) SENSITIVITY

Set the sensitivity for IVS from 00 ~ 15. The larger the value, the more sensitive the IVS will be.

5) RESET COUNT

Click **SUBMIT** to reset the flow counting number to 0 when the IVS mode is set to **FLOW COUNTING** and activated.

6) VIRTUAL FENCE AREA

Click **SETUP** to draw the detection line for IVS, and set the detection direction from left to right, or right to left. This area setting is the detection base for **IVS MODE**.

Note: There are some tips to draw the detection line. For details, please check www.surveillance-download.com/user/IVS_setup.pdf.

7) SCENE CHANGE

Select **ON** to trigger a motion event when the camera is sensed to be moved and the camera scene is changed. At the same time, the icon “.

8) SCENE CHANGE LEVEL

Set the detection sensitivity for **SCENE CHANGE** to **HIGH**, **MIDDLE** or **LOW**.

IVS APPLICATION

➤ **FLOW COUNTING**

Step1: Go to **VIRTUAL FENCE AREA** to draw a detection line with your mouse, and decide the detection direction by selecting **REVERSE**.

Step2: Click **APPLY** to finish the IVS setting and return to the live view. The IVS icon “

When anyone walks across the detection line, the system will determine his movement is in or out, and add one count to the corresponding channel on the flow counting panel.

| | |
|------------|--|
| IN | People coming from the opposite direction to the arrow mark. |
| OUT | People coming from the same direction as the arrow mark. |

➤ **VIRTUAL FENCE and ONE WAY**

Step1: Go to **VIRTUAL FENCE AREA** to draw a detection line with your mouse, and decide the detection direction by selecting **REVERSE**.

Step2: Click **APPLY** to finish the IVS setting and return to the live view.

When anyone walks across the detection line, the system will determine his movement is in or out, and:

| | |
|----------------------|--|
| VIRTUAL FENCE | An event happens for anyone walking across the detection line, and “  ” will be shown on the screen. |
| ONE WAY | An event happens for anyone walking from the opposite direction to the arrow mark, and “  ” will be shown on the screen. |

IVS STATISTICS

Click “” → “” to enter the event search menu. Then, select **STATISTIC**

| LIST | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Chart View

6.4.10 NOTIFY

You can configure this DVR to send notifications for certain events to mobile devices with our mobile app, EagleEyes, installed, or to the specified E-mail address(es) or FTP site.

PUSH VIDEO

Note: This function is for selected models only.

Before using this function, make sure:

- An external alarm is connected to the alarm-in port on the rear panel.
- You have an iOS or Android mobile phone or tablet.
- You have subscribed the mobile network service from your mobile service provider.
- The mobile app, EagleEyes, is installed in your mobile device. For details, please refer to “7.2 Mobile Devices” at page 62.
- You have configured EagleEyes to access this DVR, and **Guard** is enabled. For details, please refer to “A2.3 Enable Push Video” at page 67.

You’ll get an active event notification with video telling you the occurrence of alarm event(s).

| ADVANCED CONFIG | | | | |
|---|----------------------------|----------------------------|--------------|--|
| CANERA DETECTION ALERT NETWORK DISPLAY RECORD DEVICES DCCS IVS NOTIFY JOYSTICK | PUSH VIDEO | PUSH STATUS | MESSAGE MAIL | |
| | MAIL | FTP | | |
| | RESET ALL GUARD CONNECTION | | SUBMIT | |
| | GUARD TRIGGER BY | | ALARM IN 1 | |
| | CH01 | ALARM OFF / INTERNAL ALARM | CH1 | |
| | CH02 | ALARM OFF | CH2 | |
| | CH03 | ALARM N.O. | office | |
| | CH04 | ALARM OFF | CH4 | |
| | EXIT | | | |

1) RESET ALL GUARD CONNECTION

When there’re more than 2 users who have the authority to enable Push Video on their mobile devices and configure its related settings, it might be confusing to know whose command is working. In this case, use this function could force the camera to discard all Push Video setup and reconfigure it.

2) GUARD TRIGGER BY

Specify which alarm device (alarm-in) should be used when **GUARD** is enabled from your iOS or Android mobile device.

3) ALARM TYPE

Select the external alarm type to **ALARM NO.**, **ALARM N.C.** and **INTERNAL ALARM**.

4) CH01 ~ 04

Enter the text you want to see when your iOS or Android mobile device receives Push Video. The default text is the channel number.

PUSH STATUS

Before using this function, make sure:

- You have an iOS or Android mobile phone or tablet.
- You have subscribed the mobile network service from your mobile service provider.
- The mobile app, EagleEyes, is installed in your mobile device. For details, please refer to “7.2 Mobile Devices” at page 62.
- You have configured EagleEyes to access this DVR, and **Guard** is enabled. For details, please refer to “A2.3 Enable Push Video” at page 67.

You'll get a text message telling you the occurrence of selected system event(s).

| ADVANCED CONFIG | | | | | |
|---|------------|---|--------------|------|-----|

| EXIT | | | | | |

Step1: Switch **ACTION** to **ON**.

Step2: Select the system event(s) you want to get notified via your mobile device.

Step3: Enable **GUARD** in EagleEyes on your mobile device, and try to trigger a system event to see if you'll get Push Status.

MESSAGE MAIL

Note: For E-mail notifications, make sure you have configured an E-mail account in **NETWORK** → **E-MAIL** to send the notifications.

Enable this function in **ACTION**, select the event type(s) you want to send notifications in **EVENT**, and add the E-mail address(es) to which you want to send notifications in **RECEIVER**.

You'll get an E-mail telling you the occurrence of your selected event(s).

- 1) E-MAIL BY EVENT
Select to receive email notifications when any event occurs.
- 2) E-MAIL BY GUARD
Select to receive email notifications only when Push Video and Push Status events occur.
- 3) RECEIVER
Click "Setup" to enter the email address(es) of the person(s) to receive email notifications.
- 4) CONTENT TYPE
Select which type of notifications you want to receive: **LINK**, **AVI** or **JPEG**.
 - For **LINK**, you'll receive an html file. For details, please refer to the next section "How to check video footage by LINK".
 - For **AVI**, you'll receive a file of video footage in the "AVI" format.
 - For **JPEG**, you'll receive a snapshot in the "JPEG" format.

How to check video footage by “LINK”

Step1: Open the html file received.

Note: Please accept and install ActiveX control on your computer. It’s recommended to use Internet Explorer to open the HTML file.

Step2: Enter the user name and password to log into this DVR, and select the channel you want.

Step3: Click **Open** to download the footage to your computer and play.

Note: The footage download and playback will be failed if either of your DVR and PC is not connected to Internet.

Playback panel

The image shows a screenshot of a web interface for a Network Video Recorder (NVR). At the top, there are input fields for 'User Name' (admin), 'Password' (masked with dots), 'Channel' (1), 'Start Time' (2012/01/18 15:04:54), and 'End Time' (2012/01/18 15:05:05), followed by an 'Open' button. A red arrow points from the text 'User name and password used to log into this NVR' to the password field. Another red arrow points from 'Click to download & play the recording' to the 'Open' button. Below the form is a video player showing an aerial view of a street intersection with cars and trees. The video player has a status bar at the top with 'DATE TIME: 2012/01/18 15:04:56 Direction: FORWARD Speed: Normal DATA LOAD: 19% / PLAY LOAD: 96%' and a control bar at the bottom with buttons for 'Play', 'Pause', 'Stop', 'Rewind', 'Fast', and a 'Deinterlace' checkbox. A red arrow points from the text 'Playback panel' to the control bar.

6.4.11 JOYSTICK

In this menu, you can adjust the speed of pan / tilt movement of the speed dome camera or a motorized-pan camera.

Note: To control the movement of the speed dome camera, you can choose  from the PTZ control panel and move on the screen ("5.3 PTZ Control" at page 17), or simply connect the compatible joystick, AVX102, to the DVR.

6.5.2 REGULAR REPORT

This function is used to send event reports to the specified E-mail address. Users could configure up to 5 profiles to receive different reports about specific channels at different time.

Note: This function is for selected models only.

Note: This function is available only when a hard disk is installed, and the DVR is connected to Internet.

| SCHEDULE SETTING | | |
|-----------------------|------------------------|---------|
| RECORD | PROFILE | 1 |
| DETECTION | ACTIVE | ON |
| ALARM IN | EXECUTION PERIOD | MONTHLY |
| ALARM OUT | EXECUTION DAY OF MONTH | 1 |
| PUSH VIDEO | EXECUTION HOUR | 1 |
| BUZZER | CHANNEL | CH1 |
| REGULAR REPORT | EVENT TYPE | MOTION |
| AUTO BACKUP | E-MAIL | SETUP |
| REGULAR REBOOT | | |
| EXIT | | |

Step1: Select the profile you want to configure, and enable it.

Step2: Select the frequency to send reports in **PERIOD: DAILY / MONTHLY / WEEKLY.**

Step3: When **MONTHLY** or **WEEKLY** is selected, select which date or day from **EXECUTION DAY OF MONTH** or **EXECUTION DAY OF WEEK.**

Step4: Then, select which time you want to receive reports, which channel(s) you want to see, and which event type(s) you want to see (**MANUAL / MOTION / ALARM / SYSTEM / TIMER / HUMAN DETECTION / INFLOW / OUTFLOW / VIRTUAL FENCE / ONEWAY / SCENE CHANGE**).

Step5: Configure the email address to receive reports.

Note: The sender E-mail should be configured in **ADVANCED CONFIG → NETWORK → E-MAIL** for this function to work properly. For details, please refer to "E-MAIL" at page 39.

6.5.3 AUTO BACKUP

This function is used to schedule video backup regularly, uploading security footages to a FTP site (remotely) or saving to an USB device connected to the DVR (locally).

Note: This function is for selected models only.

You can configure up to 7 profiles and use one of them as your backup preference.

| SCHEDULE SETTING | | |
|--------------------|--------------------------|----------------|
| RECORD | PROFILE | 1 |
| DETECTION | ACTIVE | ON |
| ALARM IN | FTP USER NAME | Office |
| ALARM OUT | FTP PASSWORD | •••••••• |
| PUSH VIDEO | FTP PORT | 25 |
| BUZZER | FTP SERVER | 211.75.33.2144 |
| REGULAR REPORT | FTP DIRECTORY | Video |
| AUTO BACKUP | METHOD | FTP |
| REGULAR REBOOT | VIDEO | ALL |
| | AUDIO | 2 SELECTED |
| | VIDEO SOURCE | RECORD STREAM |
| | EXECUTION PERIOD | WEEKLY |
| | EXECUTION DAY OF WEEK | MON |
| | EXECUTION HOUR | 23 |
| | BACKUP START DAY OF WEEK | MON |
| | BACKUP START TIME | 23:00 |
| | BACKUP END DAY OF WEEK | MON |
| | BACKUP END TIME | 23:00 |
| EXIT | | |

- 1) PROFILE
Select the profile you want to configure.
- 2) ACTIVE
Switch to ON to enable the selected profile.
- 3) FTP USER NAME / FTP PASSWORD / FTP PORT / FTP SERVER / FTP DIRECTORY
Enter all the information needed to access the FTP site you want if you want to upload those footages to an FTP site.
- 4) METHOD
Choose where you to save those footages: **FTP / USB DEVICE**.
- 5) VIDEO / AUDIO
Select the video / audio channels you want to backup.
- 6) VIDEO SOURCE
Choose **RECORD STREAM** or **SUB STREAM**:
 - **RECORD STREAM**: The video quality is good, but it also consumes much storage.
 - **SUB STREAM**: It consumes less storage, but the video quality might be not satisfactory.
- 7) EXECUTION PERIOD
Select how often you want to backup footages: **WEEKLY** or **DAILY**.
- 8) EXECUTION DAY OF WEEK
This option is available only when **WEEKLY** is chosen. Select one day from **MON ~ SUN**.
For example, if you want to backup video data from Monday, 01:00am to Friday, 23:59pm on every Saturday, 09:00am, choose SAT here.
- 9) EXECUTION HOUR
Select an exact hour to start rebooting from **0 ~ 23**.
For example, if you want to backup video data from Monday, 01:00am to Friday, 23:59pm on every Saturday, 09:00am, choose 9 here.
- 10) BACKUP START DAY OF WEEK
This option is available only when **WEEKLY** is chosen. Select one day from **MON ~ SUN**.
For example, if you want to backup video data from Monday, 01:00am to Friday, 23:59pm on every Saturday, choose MON here.
- 11) BACKUP START TIME
Enter the start time for backup.
For example, if you want to backup video data from Monday, 01:00am to Friday, 23:59pm on every Saturday, enter 01:00 here.
- 12) BACKUP END DAY OF WEEK
This option is available only when **WEEKLY** is chosen. Select one day from **MON ~ SUN**.
For example, if you want to backup video data from Monday, 01:00am to Friday, 23:59pm on every Saturday, choose FRI here.
- 13) BACKUP END TIME
Enter the end time for backup.
For example, if you want to backup video data from Monday, 01:00am to Friday, 23:59pm on every Saturday, enter 23:59 here.

6.5.4 REGULAR REBOOT

This function is used to schedule this device to reboot regularly to free some unused cache data and make the system more reliable.

Note: This function is for selected models only.

| SCHEDULE SETTING | | | | | | | | | |
|---|--|--------|----|------------------|----------------------------------|------------------------|----------------------------|----------------|----------------------------|
| <p>RECORD DETECTION ALARM IN ALARM OUT PUSH VIDEO BUZZER REGULAR REPORT AUTO BACKUP REGULAR REBOOT</p> | <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">ACTIVE</td> <td style="width: 50%;">ON</td> </tr> <tr> <td>EXECUTION PERIOD</td> <td>MONTHLY <input type="checkbox"/></td> </tr> <tr> <td>EXECUTION DAY OF MONTH</td> <td>1 <input type="checkbox"/></td> </tr> <tr> <td>EXECUTION HOUR</td> <td>1 <input type="checkbox"/></td> </tr> </table> | ACTIVE | ON | EXECUTION PERIOD | MONTHLY <input type="checkbox"/> | EXECUTION DAY OF MONTH | 1 <input type="checkbox"/> | EXECUTION HOUR | 1 <input type="checkbox"/> |
| ACTIVE | ON | | | | | | | | |
| EXECUTION PERIOD | MONTHLY <input type="checkbox"/> | | | | | | | | |
| EXECUTION DAY OF MONTH | 1 <input type="checkbox"/> | | | | | | | | |
| EXECUTION HOUR | 1 <input type="checkbox"/> | | | | | | | | |
| EXIT | | | | | | | | | |

2) ACTIVE

Switch to ON to enable this function.

3) EXECUTION PERIOD

Select how often you want to reboot the system: **MONTHLY**, **WEEKLY** or **DAILY**.

4) EXECUTION DAY OF MONTH / EXECUTION DAY OF WEEK

Depending on the option you selected in **EXECUTION PERIOD**:

- **EXECUTION DAY OF MONTH** shows when **MONTHLY** is selected. Select one day from 1 ~ 31 to reboot.
- **EXECUTION DAY OF WEEK** shows when **WEEKLY** is selected. Select one day from Monday ~ Sunday to reboot.

5) EXECUTION HOUR

Select an exact hour to start rebooting from **0** ~ **23**.

7. REMOTE OPERATION

7.1 Web Browser

You can view the images or operate your DVR with a web browser, for example, Microsoft Internet Explorer.

Note: The supported PC operating systems are Windows 10, Windows 8, Windows 7 & Windows Vista, and it's recommended to run Internet Explorer as administrator (Run as administrator).

Note: The illustration below is just for your reference and may be different from what you actually see. Some functions and buttons are for selected models or certain user levels only.

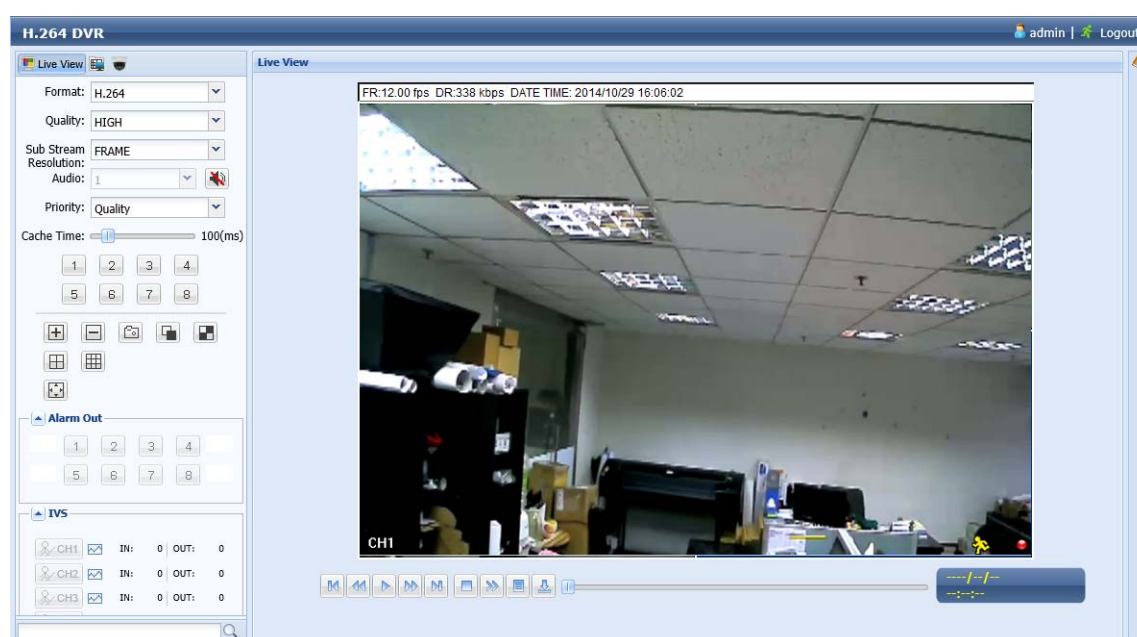

Step 1: Key in the IP address used by this device in the URL address box, such as 60.121.46.236, and press Enter. You will be prompted to enter the user name and password to access the device.

If the port number this device used is NOT 80, you need to key in the port number additionally. The format is **ipaddress:portnum**.

For example, for the IP address 60.121.46.236 and port No. 888, please key in "http://60.121.46.236:888" into the URL address box, and press **Enter**.

Step 2: Enter the user name and password, and click **OK**. You will see a similar screen as the following when the login information is correct.

Note: The default user name and password for remote access are both **admin**.

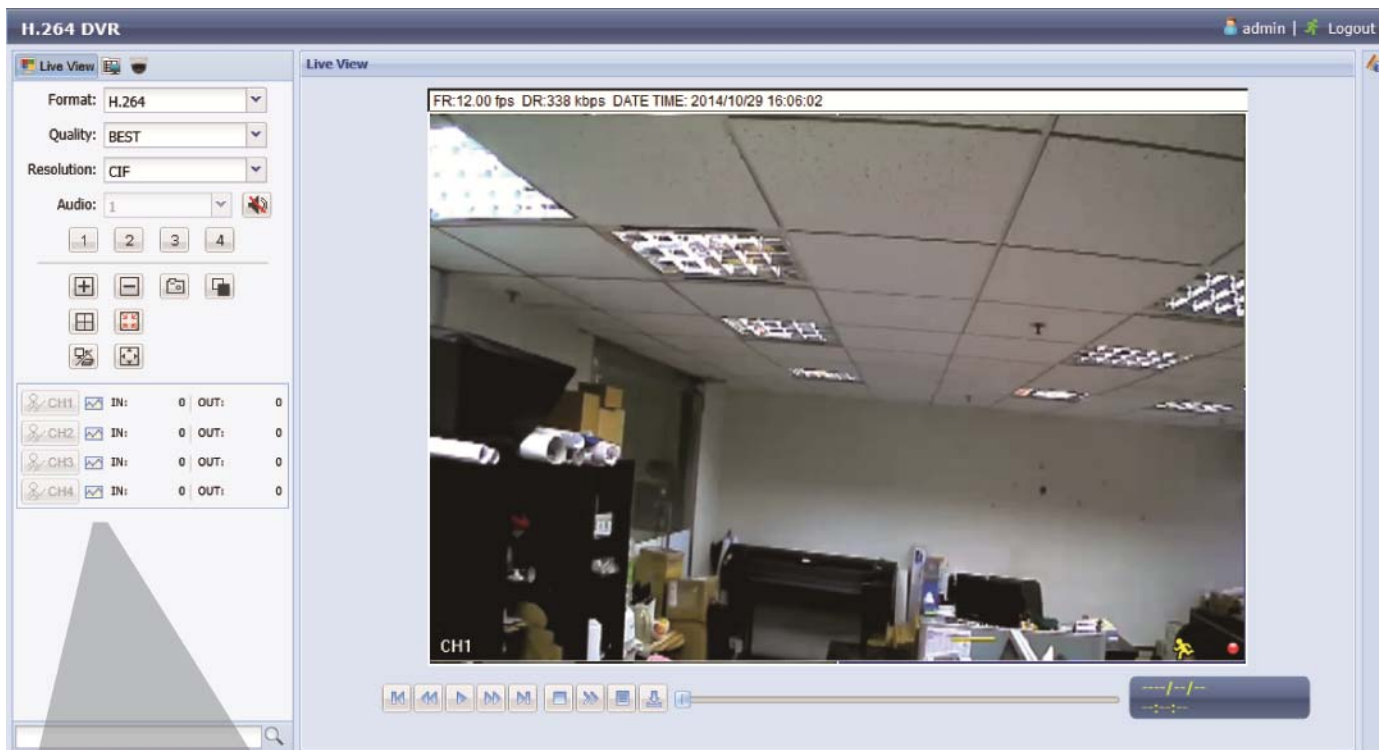

| Icon | Description |
|---|--|
|  | Click to go to the live view of the DVR. |
|  | Click to go to the detailed DVR setting. |
|  | Click to enter the PTZ mode. This function is also used for our band's HD CCTV motorized camera series to adjust its focal length and focus remotely. For details, please refer to "7.1.2 PTZ Panel" at page 61. |
| Video / Audio Control | |
| Format | H.264 / QuickTime QuickTime is Apple Inc.'s multimedia software. You need to have QuickTime installed in your operation system first. When "QuickTime" is selected, you will be prompted to enter the user name and password to access the server of the DVR. |
| Quality | BEST / HIGH / NORMAL / BASIC Select the image quality. |
| Sub Stream Resolution | FRAME / CIF Select the sub stream resolution (FRAME: 704*480 / CIF: 352*240) for live display. |
| Audio | Select the audio channel you want for listening to the live audio. Note: Your camera must support audio recording, and connect to the video channel which supports audio recording and the audio input of the DVR. For details, please refer to "1.3 Rear Panel" at page 2. |

| Icon | Description |
|---|---|
| |  means mute. To disable the mute status, click this icon again and select the audio channel you want. |
| Streaming | This function shows only when a single channel is selected. Choose the stream resolution for live display. When Sub Stream is selected, the resolution will be the one selected in Sub Stream Resolution ; When Recording is selected, the resolution will be the one selected in  -> DVR -> Record. -> Manual. |
| Cache Time | Select the cache time from 0 ~ 800ms . The higher the value, the more time it's going to be needed to wait for the image to show, but the better the image quality will be. |
| Channel Control | |
| Channel Selection (1 ~ 16 / 1 ~ 8 / 1 ~ 4) | Click one of the numbers to switch to the channel you want to see in full screen. |
|  | Click to go to the previous / next channel, or change setting. |
|  | Click to take a snapshot of the current view, and save it to the specified path in your PC set in  -> General . |
|  |  : Click to display each channel one by one, starting from CH1. When the last channel is displayed, it will start from CH1 again.  : To exit from this display mode, press any other channel display button. |
|  | Click to show 4-cut / 9-cut / 16-cut display. |
|  | Click to switch the display to full screen. |
| Event Search & Playback | |
|  | Increase the speed for fast rewind. Click once to get 4X speed rewind and click twice to get 8X speed, etc., and the maximum speed is 32X. |
|  | Increase the speed for fast forward. Click once to get 4X speed forward and click twice to get 8X speed, etc., and the maximum speed is 32X. |
|  | Click to play the current video clip. |
|  | Click to pause the video playback. |
|  | Click to stop the video playback. |
|  | Click to play the video clip slowly, once to get 4X slower, twice get 8X slower. |
|  | Click to enter the record list and search and footage you need. |
|  | Click to enter the backup menu and copy the footage you need to your PC. Note: To play the backup file (.avc), go to  -> General -> Configure , and download the player to install. |
| Alarm Out* | |
| Channel Selection (1 ~ 8 / 1 ~ 4) | Click one of the channel numbers to command the camera to trigger the alarm-out device you want. |
| IVS Panel* | |
|  | This button is enabled only when the IVS mode is enabled. Click to show the detection line. |
|  | Click to enter the IVS statistics page. For details, please refer to "7.1.1 IVS Statistics" at page 60. |

7.1.2 PTZ Panel

Note: This function is for selected models only.

| Function | Description |
|---|---|
|  | Click to enter the camera main menu. For details about each camera menu, please refer to its own user manual. |
|  | Click the arrow keys (▲ / ▼ / ◀ / ▶) to move the camera lens up / down / left / right. |
| PTZ Channel | Select the channel which connects the PTZ camera or our brand's HD CCTV motorized camera you want to control. |
| Preset | Click on the preset point numbering to which you want your camera to move. |
|  | Click to adjust the focus of the image. |
|  | Click to zoom in / out the image. |
|  | Click to zoom in on the image to the largest / zoom out on the image to its original size. |
|  | Click to start auto tracking when your speed dome camera supports this function. |
|  | Click to take a snapshot of the current view, and save it to the specified path in your PC set in  → General . |
|  | Click to activate the auto function. Before using it, you need to assign a specific function that will be enabled when "AU TO" is clicked. For details, please refer to the user manual of your PTZ camera or our brand's HD CCTV motorized camera. |

7.2 Mobile Devices

Note: For more details about mobile surveillance via your mobile device, please visit <http://info.eagleeyes.tw/iphone/index.html>.

EagleEyes is a mobile phone program used with our surveillance system for remote surveillance. It's compatible with iOS and Android mobile devices, and it's free (Except *EagleEyes Plus* for iOS OS, and *EagleEyes Plus+* for Android OS).

7.2.1 Prerequisites

Before installing *EagleEyes* to your mobile device for remote surveillance, make sure you have checked the following:

- ✓ Your mobile platform is iOS or Android.
- ✓ Mobile Internet services are subscribed and available to use for your mobile device.

Note: You might be charged for Internet access via the wireless or 3G / 4G network. For the Internet access rate details, please check with your local network operator or service provider.

- ✓ You have noted down the IP address, port number, user name and password used to access your network camera from Internet.

7.2.2 Where to download

Go to **App Store / Play Store** from your iOS / Android mobile devices and search *EagleEyes* to download.

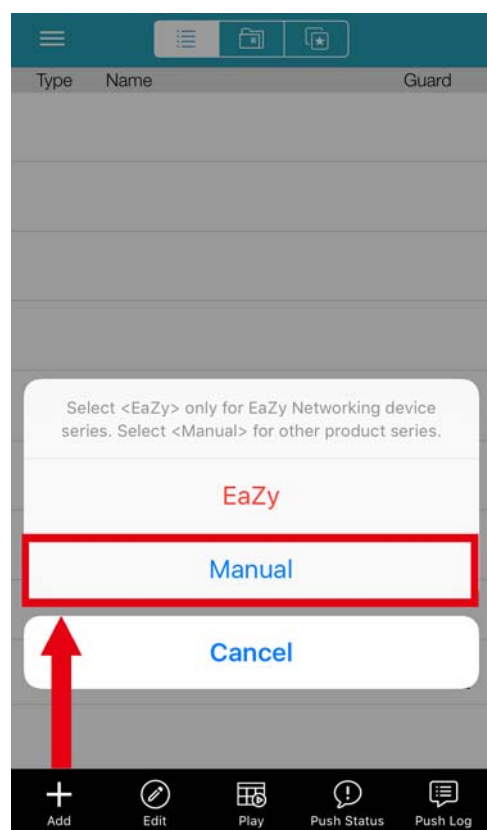

When the download is completed, *EagleEyes* will be installed automatically to the location where all applications are saved in your phone by default, or where you specify.

7.2.3 Manual Setup

Note: To know how to configure by EaZy Networking, please refer to "APPENDIX 7 EAZY NETWORKING" at page 74.

Step1: Open *EagleEyes* to go to the address book.

Step2: Then, click **+**, and select **Manual** to go to the setting page.

Step3: In the setting page, enter all the information needed to access this device in the **REQUIRED** column, and click **Get Type** to examine if the information you entered is correct. The device type will be detected properly.

Step4: (Optional) Configure the settings in the **OPTIONAL** column as needed.

Step5: Click **Save** to return to the address book. Enable **Guard** to receive Push Video / Push Status.

Note: Push Video / Push Status is for selected models only. Before enabling **Guard**, please make sure if your device supports this function.

Step6: Click on the item you just added in the address book to access and check the live view.

APPENDIX 2 PUSH VIDEO CONFIGURATION

Note: This function is for selected models only.

A2.1 Alarm Sensor Connection

Connect the alarm sensor, such as magnetic contacts, to the alarm-in port on the rear panel. Alarm-in 1 corresponds to video channel 1, alarm-in 2 corresponds to video channel 2, and so on.

Note: The voltage restriction for alarm-in device connection is under DC24V 1A.

If the connected camera is our brand's camera with alarm I/O support, you can also connect the alarm sensor to the camera.

Note: Please check the user manual of the camera to know voltage restriction for alarm-in device connection.

Then, go to (ADVANCED CONFIG.) → **DETECTION** and make sure:

- MOTION is set to **ON**.
- ALARM** is configured (**N.C.** / **N.O.**) when an external alarm device is connected, or **INTERNAL ALARM** is set to **ON** when the connected camera has a PIR sensor built-in.

| ADVANCED CONFIG | | | | |
|------------------|--|-----|-----|-------|
| CAMERA | CH1 | CH2 | CH3 | CH4 |
| DETECTION | LS | | | 07 |
| ALERT | SS | | | 03 |
| NETWORK | TS | | | 02 |
| DISPLAY | MOTION | | | ON |

| IVS | INTERNAL ALARM <i>(For selected models only)</i> | | | ON |
| NOTIFY | GUARD LOCK | | | SETUP |
| JOYSTICK | | | | |
| EXIT | | | | |

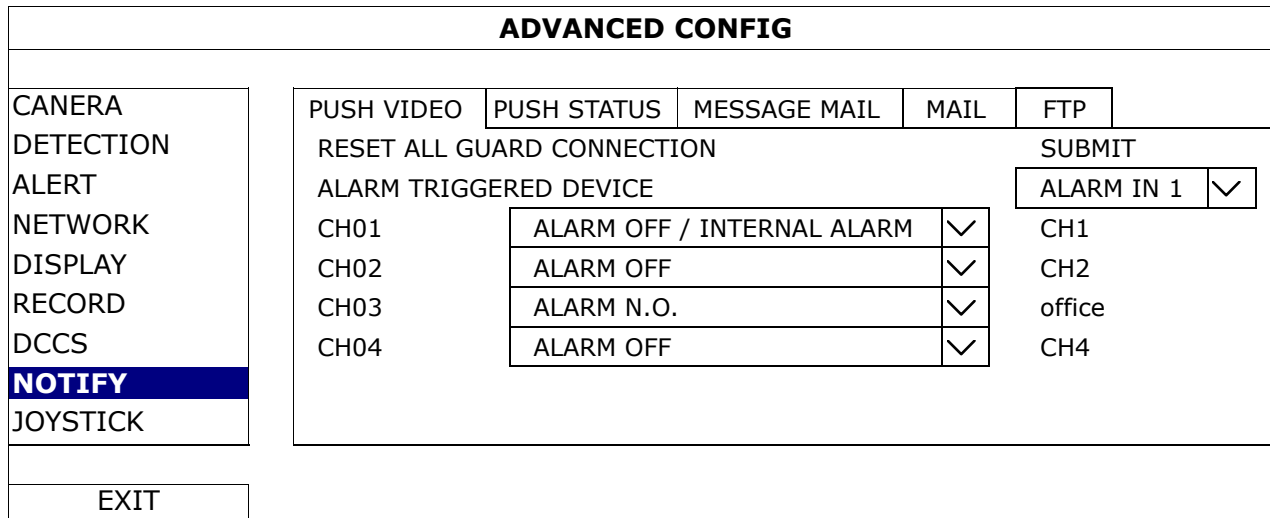

A2.2 Configuration

Before configuring Push Video, make sure:

1. The DVR system is set up as described in “2. CONNECTION AND SETUP” at page 4.
2. The DVR is connected to Internet.
3. You’ve installed the app, EagleEyes, on your iOS or Android mobile devices.
For details, please refer to “7.2 Mobile Devices” at page 62.

Step1: Right click to show the main menu.

Go to  (ADVANCED CONFIG.) → **NOTIFY**. In PUSH VIDEO, select the alarm device you want, and configure the alarm type. For details, please refer to “PUSH VIDEO” at page 49.

Step2: Open EagleEyes, and add this DVR to the EagleEyes address book.

A2.3 Enable Push Video

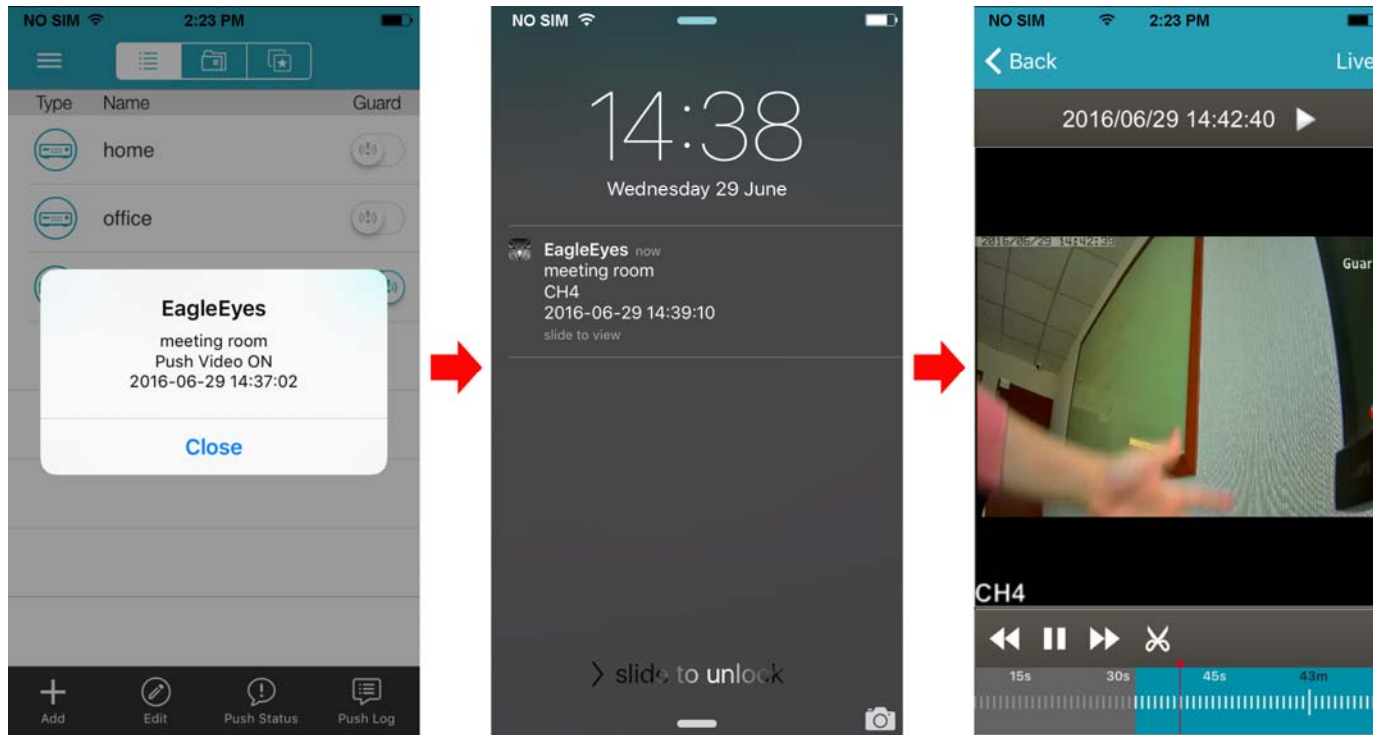

A2.3.1 From iOS Mobile Device (iPhone / iPad)

Step1: In the iPhone / iPad main menu, select **Settings** → **Notifications**. Select **EagleEyes**, and make sure the notification is set to on.

Step2: Open **EagleEyes**, and switch **Guard** to **ON**. You'll receive the message indicating that Push Video is on.

Step3: Return to the main page or standby page of iPhone / iPad. You'll receive event notifications when there's an alarm event. Follow the on-screen instruction to immediately play the recorded clip.

A2.3.2 From Android Mobile Device

Step1: Open **EagleEyes**, and switch **Guard** from **OFF** to **ON**. You'll receive the message indicating that Push Video is on.

Step2: Return to the main page or standby page. You'll receive event notifications when there's an alarm event. Follow the on-screen instruction to immediately play the recorded clip.

APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST

Please upgrade the firmware of the DVR to the latest version to ensure the accuracy of the following table. If the USB flash drive is not supported by the DVR, you will see  on the screen.

Note: Please use your PC to format the USB flash drive as "FAT32".

Note: You can backup up to 2GB video data for one-time USB backup. To backup more data, please set the time & channel(s) you want, and start USB backup again.

| MANUFACTURER | MODEL | CAPACITY |

APPENDIX 4 COMPATIBLE SATA HDD LIST

Please upgrade the firmware of the device to the latest version to ensure the accuracy of the following table.

Note: It's necessary to install a hard disk first before firmware upgrade to ensure the upgrade process works properly.

Note: To use a green hard disk, use **ONLY** the hard disk designed especially for surveillance to ensure the device works properly.

APPENDIX 6 DVR BATTERY REPLACEMENT

DVR time reset after power failure, for example, caused by a power outage, will cause the disorder of the recorded data, and users may have problems in searching the event clip they want. To keep the DVR time from resetting, a non-chargeable lithium battery, CR2032, is installed in the DVR.

However, the DVR time might still get reset when the DVR battery is low or even running out of power. If so, please replace the DVR battery, CR2032, **right away** as instructed below.

➤ How to replace CR2032

Note: The lithium battery, CR2032, is a non-chargeable battery, and should be purchased separately. Please replace only with the same or equivalent type battery in case of danger.

Step1: Stop all DVR recording **immediately** to prevent the disorder of the recorded data. Then, back up the recorded data if necessary.

Step2: Power off the DVR, and disconnect the DVR power.

Step3: Remove the DVR cover, and find the battery on the mainboard.

Step4: Push the release as indicated below to remove the battery.

Step5: Get a new battery with the side of “CR2032” facing up, and install it to the mainboard.

Step6: Replace the DVR cover and connect to power.

Step7: Set DVR date & time, and resume recording. For details, please refer to “6.1.2 TIME SETUP” at page 25, and “6.4.6 RECORD” at page 43.

APPENDIX 7 EAZY NETWORKING

EaZy Networking is a free P2P cloud service to connect AVTECH devices to the Internet automatically by plug-and-play, enabling you to check the live view via your mobile device or laptop at anytime.

In most cases, the device is connected via P2P. Connection via the relay server is only applied to some complex environments such as the private IP-based network environment used by a large enterprise. There is no speed limitation of P2P connection. For connection via the relay server, the speed is up to 10FPS@512kbps. To obtain stable transmission, it's recommended to purchase our data plan of 1GB or 7GB. Each device will enclose a 2GB data plan for a free trial.

EaZy Networking could be configured via EagleEyes on an iOS / android device, or via Internet Explorer.

Before using this function, make sure:

- This DVR is connected to a switch or router, and the switch or router is ready for Internet connection.
- The network icon on the top right corner is , not .
- You have an iOS / Android mobile device with EagleEyes installed.

A7.1 Via EagleEyes on iOS / Android Device

A7.1.1 Setup

Step1: Right-click to show the main menu, and select **NETWORK** → **WAN**. Set **NETWORK TYPE** to **DHCP**, and make sure the network icon on the top right corner is changed from  to .

Note: **DHCP** allows your router to assign an IP address for your device automatically. There are also **STATIC** and **PPPOE** to choose for the network type. Please choose the one needed for your network environment and get the information needed from your installer or network service provider.

| ADVANCED CONFIG | |
|------------------------------|---|
| CAMERA DETECTION ALERT | WAN E-MAIL DDNS PROTOCOL EaZy |
| NETWORK | NETWORK TYPE DHCP <input checked="" type="checkbox"/> |

| | ENABLE UPNP OFF |
| EXIT | MAC: 00:0E:53:EC:A7:B4 |

Step2: In the same menu, select **EaZy**. Enable EaZy Networking, and leave this page open. You'll need to scan the QR code later. You'll see either of the setup pages below. Go to "A7.1.2 EagleEyes Setup" to know which option you should choose during setup.

Type 1 ("EaZy" on EagleEyes)

| WAN | E-MAIL | DDNS | PROTOCOL | EaZy |
|---|--------|------|----------|------|
| ENABLE EAZY NETWORKING | | | | ON |
|  000E532B8613 | | | | |

Type 2 (Both "EaZy" and "QR Code" on EagleEyes)

| WAN | E-MAIL | DDNS | PROTOCOL | EaZy |
|---|--------|------|----------|------|
| ENABLE EAZY NETWORKING | | | | ON |
| MAC: 000E53ECA7B4 | | | | |
| UUID: e736dcbf-d4bb-4ca8-86fd-62658e2ecec1 | | | | |
| PORT: 80 | | | | |
|  | | | | |

A7.1.2 EagleEyes Setup

Two options can be chosen for EaZy Networking: **EaZy** and **QR Code**. **EaZy** is used for both recorders and IP cameras while **QR Code** is used only for recorders.

When a device is configured to the internet via **EaZy**, the person who configures the device has the administrator permission of this device and also has the power to assign who can access the device remotely, by the web browser of Internet Explorer or the mobile app of EagleEyes.

When a device is configured to the internet via **QR Code**, everyone has the right to access the device as long as he/she is able to scan the QR code of the device. However, he/she can only access the device via the mobile app of EagleEyes. Internet Explorer is not supported.

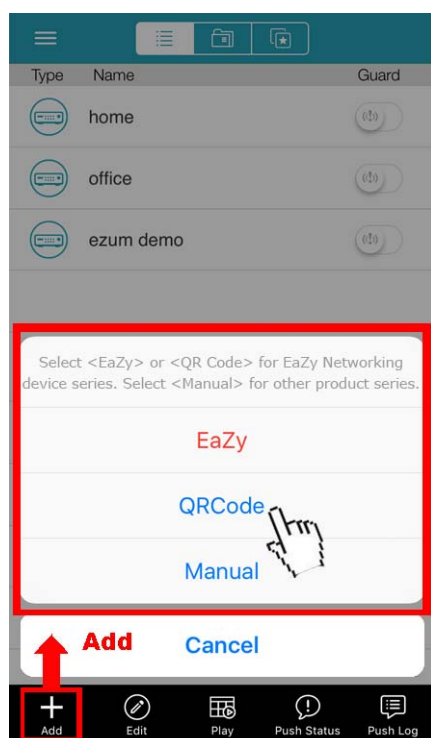

■ By QR Code (For Type 2 only)

Step1: Open EagleEyes on your mobile device, and select “...” on the top left corner in the address book. Then, click **QR Code**.

Step2: Scan the QR code shown on your recorder, and enter the title of this device and its user name and password.

Step3: Make sure you see the device type when you tap **Get Type**. If not, the device is not connected properly. Then, Tap **Apply** to complete the process, and you're ready to see the live view.

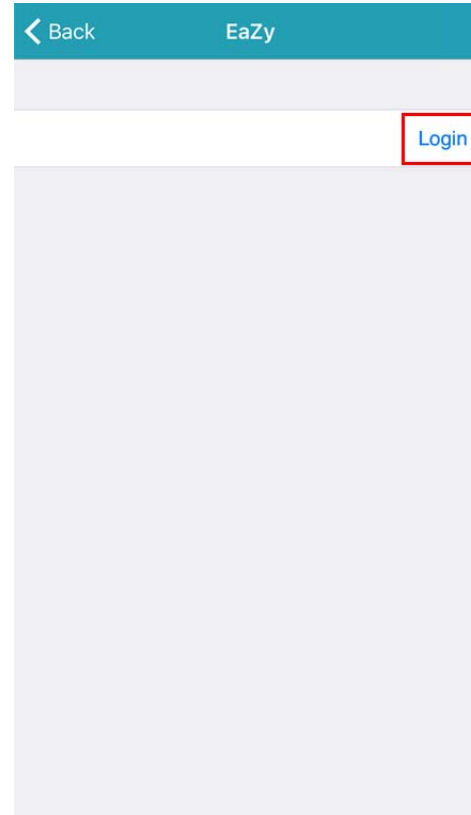

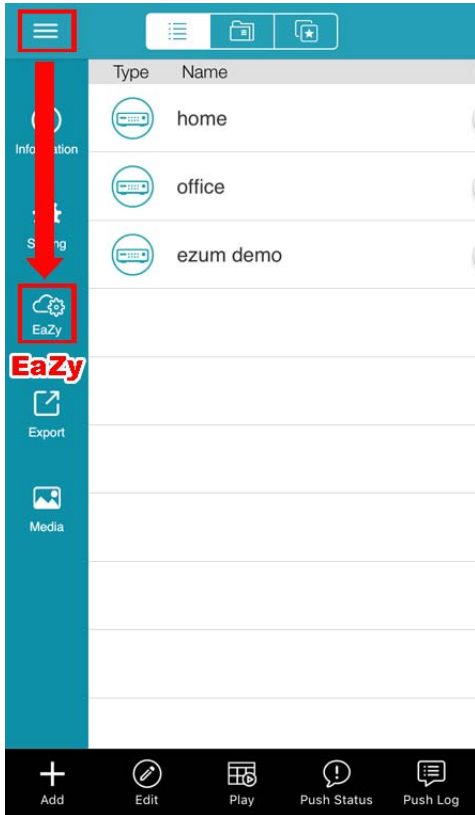

Note: For the first time to connect your device to the internet, the default user name and password are both **admin**. If it's been configured before, make sure you've known its current user name and password since they may be changed for security purpose.

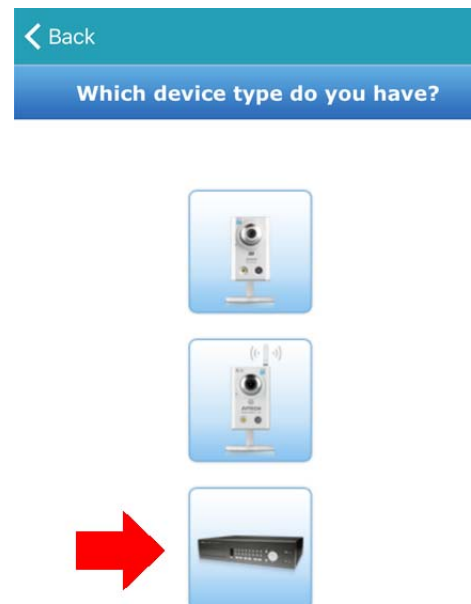

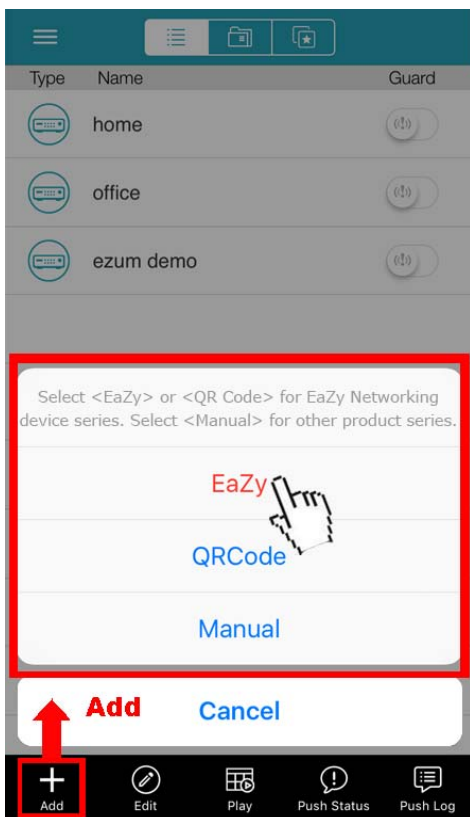

■ By EaZy (For Type 1 and Type 2)

Step1: Open EagleEyes on your mobile device, and select “...” on the top left corner in the address book. Then, click **EaZy**.

Step2: Click **Login** and register an account for “Cloud Service”. If you’ve got an account, please just log in.

Step3: Go back to the address book and click + to add a new device. Select **EaZy**, and choose the recorder icon to continue.

Step6: Click  in the section of **MAC address** to open the QR code scan page, and scan the QR code on the recorder screen mentioned in Step2. The MAC address will be filled automatically.

Fill in the Captcha code manually, and click **Apply**.

Step7: Follow the on-screen instruction to finish the rest of the settings, and see if this device is added successfully to the address book as a cloud device.

At the same time, you'll be prompted to confirm if you want to remove the default user name and password.

- When the default user name and password are removed, you can **ONLY** use the user name and password of the cloud service to access this recorder locally and remotely. If you forget the user name and password of the cloud service, you could only reset the recorder and do all configurations again.
- When the default user name and password are kept, other people might be able to access this recorder if they know the default user name and password of this recorder.

Confirm if you want to keep the default account to continue, and return to the address book. You'll see the newly-added device in the address with a cloud icon on it.

Find the MAC address sticker on the rear panel or bottom of your device.

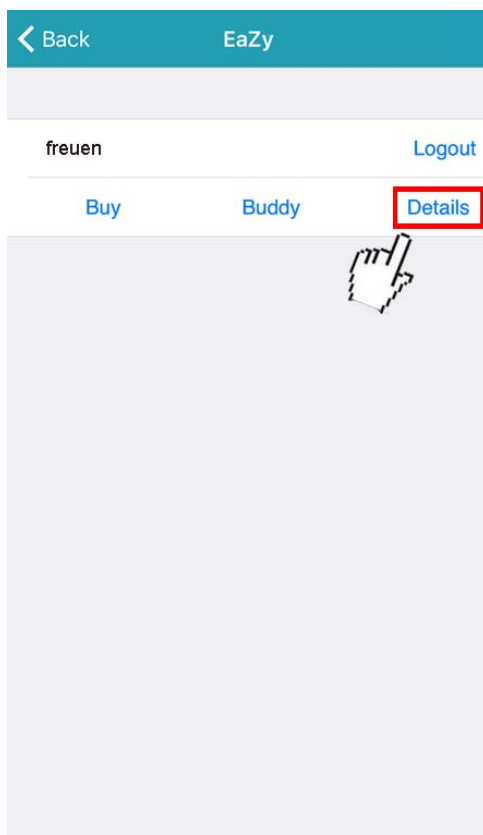

Step8: Click the newly-added device and see if you could access successfully.

A7.1.3 Checking Remaining Data Allowance

Step1: Log into the cloud service.

Step2: Select **Details** to go to account information, and select **Available Data Allowance**.

A7.1.4 Sharing Cloud Device Access with Other Account(s)

Note: One cloud device could be shared up to 30 cloud accounts, but the access to the device might be failed because it is still restricted to the maximum online user setup of the device.

Step1: Log into the cloud service.

Step2: Select **Buddy** to go to the buddy sharing page. Then, choose the device you want to share with, and switch from **OFF** to "Share".

Step3: Choose the device you want to share with.

Step4: Enter the cloud account or the E-mail registered by the account, and select **Add**.

Please enter a buddy's account or Email, or you could pick one from 'Buddy List' alternatively.

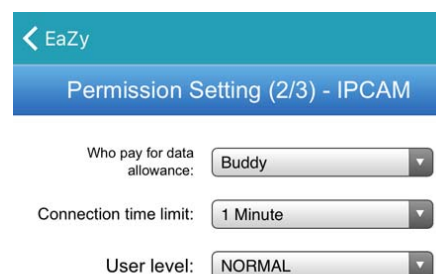

Step4: Check again the account with which you want to share your cloud device, and select **Next** to confirm and continue.

Step5: Specify the access permission of the specified account, which account's data allowance should be consumed after access successfully, and how long the account is allowed to stay after access successfully.

➤ Who should pay data allowance:

| Who should pay data allowance | The order to consume data allowance |
|-------------------------------|--|
| I | The free data allowance provided by the device -> The additional data allowance shared to other account(s) by the owner -> The additional data allowance of the device's owner -> The data allowance shared to other account(s) by the buddy |
| Buddy | The additional data allowance of the buddy -> The data allowance shared with other account(s) by the buddy |

Note: When there's no data allowance to use, the network transmission will be down to 1 FPS. To restore the fluency of live view, users need to subscribe a data plan from EagleEyes, or configure the network settings by themselves.

SUPERVISOR :
Can configure and customize all settings, hear audio stream, and receive Push Video / Push Status notifications.

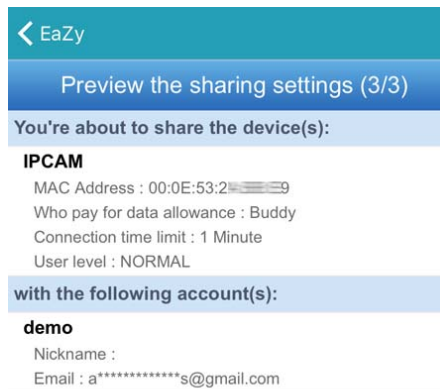

POWER USER :
Can do remote playback.

NORMAL :
Can perform basic control.

GUEST :
Can only see live stream.

Step6: Check again the configurations you made for the account to which you want to share your cloud device, and select **Share!** to confirm.

Step7: (Optional) Configure the data allowance shared to other accounts to use.

Step8: Return to the address book of EagleEyes. You'll see the device being shared is marked with an icon of two people.

A7.2 Via Internet Explorer on PC / Laptop

Note: EaZy Networking setup via a web browser is only available on Internet Explorer, and the direct setup via QR code scanning as described in "By QR Code (For Type 2 only)" at page 75 is not supported.

A7.2.1 Setup

Step1: Right-click to show the main menu, choose  (ADVANCED CONFIG), and select **NETWORK** → **WAN**. Set **NETWORK TYPE** to **DHCP**, and make sure the network icon on the top right corner is changed from  to .

Note: **DHCP** allows your router to assign an IP address for your device automatically. There are also **STATIC** and **PPPOE** to choose for the network type. Please choose the one needed for your network environment and get the information needed from your installer or network service provider.

| ADVANCED CONFIG | |
|-----------------|---|
| CAMERA | WAN E-MAIL DDNS PROTOCOL EaZy |
| DETECTION | NETWORK TYPE DHCP ▾ |
| ALERT | IP 192.168.001.010 |
| NETWORK | GATEWAY 192.168.001.254 |

| DCCS | PORT 80 |
| IVS | CHECK INTERNET AVAILABILITY BY ADDRESS www.google.com |
| NOTIFY | |
| EXIT | MAC: 00:0E:53:EC:A7:B4 |

Step2: In the same menu, select **EaZy**. Enable EaZy Networking, and write down the MAC address starting with "000E53" under the QR code. You'll need it later.

Type 1 ("EaZy" on EagleEyes)

Type 2 (Both "EaZy" and "QR Code" on EagleEyes)

Step3: Open Internet Explorer on a PC / laptop, and enter <https://ez.eagleeyes.tw>.

In the login page, register an account for **Cloud Service**. If you've got an account, please just log in.

Note: You PC must be connected to Internet.

Step4: Click + on the left pane, and you'll be prompted to install plugins: **EaZy Control** and **EaZy Wizard**. Please follow the instructions to install these two plugins to ensure the service works properly.

Note: If you're not prompted to install the plugin, please lower the security level of Internet Explorer, and try to log into the cloud service again.

Step5: Enable EaZy Wizard, and click **Start** to go to the login page. Log into the cloud service.

Step6: Select the recorder picture, or choose **DVR / NVR** on the bottom right corner. Then, enter the MAC address you wrote down in Step2, and the security code.

Click **Apply** to continue.

Step7: When your device is found, you'll be directed to the next page to change the device title if you want.

Note: The device name changed here will be fixed and can't be changed later.

Click **Apply** to continue. You'll be prompted to confirm if you want to remove the default user name and password.

- When the default user name and password are removed, you can **ONLY** use the user name and password of the cloud service to access this recorder locally and remotely. If you forget the user name and password of the cloud service, you could only reset the recorder and do all configurations again.
- When the default user name and password are kept, other people might be able to access this recorder if they know the default user name and password of this recorder.

Confirm if you want to keep the default account, and click **Apply** to continue and return to the main page.

Step8: You'll see the newly-added device with a cloud icon on the left pane. Drag and hold the device to the display area on the right pane to show in the same window, or simply double-click the device to open the device view in another window.

A7.2.2 Checking Remaining Data Allowance

Step1: Log into the cloud service.

Step2: Select **Account Information** on the top right corner to go to account information, and select **Available Data Allowance**.

A7.2.3 Sharing Cloud Device Access to Other Account(s)

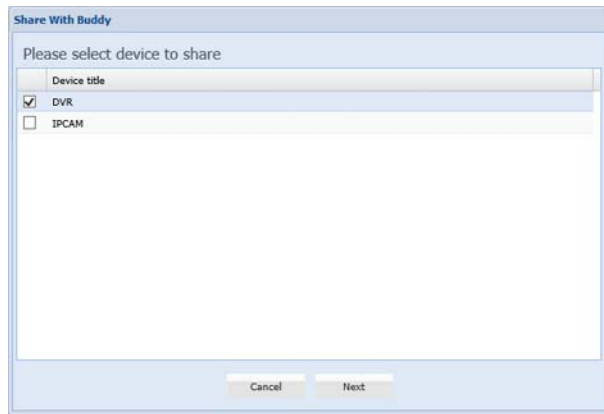

Note: One cloud device could be shared up to 30 cloud accounts, but the access to the device might be failed because it is still restricted to the maximum online user setup of the device.

Step1: Log into the cloud service.

Step2: Select **Buddy Share** to go to the buddy sharing page. Then, choose the tag **Your own device(s)**, and select **Share With Buddy**.

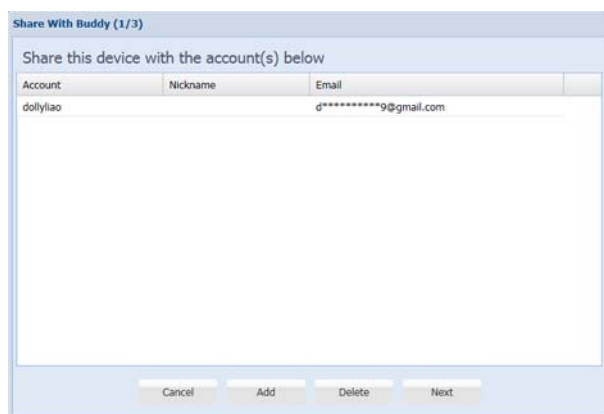

Step3: Choose the cloud device you want to share, and click **Next** to enter the cloud account or the E-mail registered by the account you want to share with. Then, select **Add**.

Step4: Check again the account to which you want to share your cloud device.

To add more accounts, select **Add**; to remove the existing account, select **Delete**; to continue buddy setup, select **Next**.

Step5: Specify the access permission of the specified account, which account's data allowance should be consumed after access successfully, and how long the account is allowed to stay after access successfully.

➤ Who should pay data allowance:

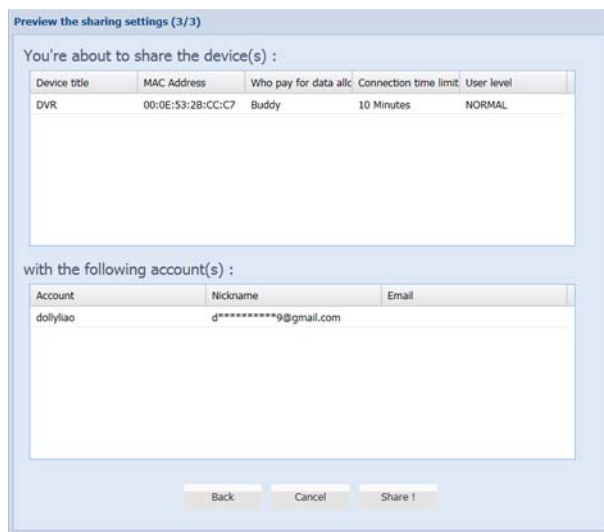

| Who should pay data allowance | The order to consume data allowance |
|-------------------------------|--|
| I | The free data allowance provided by the device -> The additional data allowance shared to other account(s) by the owner -> The additional data allowance of the device's owner -> The data allowance shared to other account(s) by the buddy |
| Buddy | The additional data allowance of the buddy -> The data allowance shared with other account(s) by the buddy |

Note: When there's no data allowance to use, the network transmission will be down to 1 FPS. To restore the fluency of live view, users need to subscribe a data plan from EagleEyes, or configure the network settings by themselves.

Step6: Check again the configurations you made for the account to which you want to share your cloud device, and select **Share!** to continue.

Step7: (Optional) Configure the data allowance shared to other accounts to use.

Step8: Return to the main page. You'll see the device being shared is marked with an icon of two people.

A7.3 Icons

| Icon | Color | Indication |
|--|-------------------------------|---|
|  | Teal | This device is a DVR or NVR. |
|  | Blue | This device is a DVR or NVR. |
|  | Orange | This device is an IP speed dome camera. |
|  | Red | This device is disconnected and unidentified. |
|  or  | Depending on the device color | This device is configured to the Internet via EaZy Networking (AVTECH Cloud Service). The cloud icon will be grayed out if the EaZy server can't be connected. |
|  | Depending on the device color | You've shared the access right of the device with other cloud account via Buddy (AVTECH Cloud Service). The icon will be grayed out if you disable the device share. |
|  | Depending on the device color | The icon will be grayed out if the device share is disabled by the owner of the device. |

For example, if you see  as the device type, you'll know:

- This device is an IP camera.
- This device is connected to the Internet via EaZy Networking.
- You were shared with the access right of the device, but the device share is disabled now.
